

Facilitation Guide of the 2021 Core Assembly

Global
Assembly

Introduction

The Global Assembly (GA) was the world's first citizens' assembly conducted at the global level. Participants were selected through a civic lottery process to represent a snapshot of the world's population in terms of geography, age, gender, education and attitude toward climate change. From October 7 - December 18 of 2021, ninety-eight¹ participants, or Assembly Members (AMs), joined 20 online sessions over 12 weeks - a total of 68 hours - to deliberate on the framing question:

“How should humanity address the climate & ecological crisis in a fair and effective way?”

The deliberations of the Core Assembly were supported by a team of 50+ individuals who were guided by **process plans**, outlining the objective, flow and outputs of each session.

The purpose of this document is to:

1. Share the process plans of the 2021 Core Assembly in the spirit of transparency and openness
2. Enable practitioners around the world to replicate and adapt the Core Assembly process

Read more about the Global Assembly in the full Report, available at <https://globalassembly.org/>

¹ 100 Assembly Members started the process and 98 completed it. The first departure occurred after the opening session and the second at the end of October.

How to use

Key The Core Assembly was completed over 5 **Blocks** during October 7th - December 18, 2021. There were two types of sessions: **Breakout Sessions** were composed of 4~6 Assembly Members distributed to maximize cultural diversity within time zone windows and **Plenary Sessions** were composed of all Assembly Members.

Block.SessionType
ex) 1.1B or 2.3P

Instructions in Session Guides are directed at the Facilitator, unless stated otherwise. Logistical tips, either for Facilitators or supporting personnel, are **highlighted in beige**. Scripted guidelines for Facilitators are *highlighted in green & italicized*. Outputs from each session are listed at the bottom of each session.

Resources Members of the Core Assembly used four types of resources during their learning journey, which are all available to the public. Resources that were used in each session are listed in the **gray banner** at the top of each session. **References** are embedded throughout the guide, offering additional detail on how they were used.

Access the full resources below:

- [Information Booklet](#) - Written booklet created to inform the learning phase of the Global Assembly.
- **Supplemental Workbook - Practitioner's Version** ([PDF](#), [Google Sheets](#)) - A series of exercises designed to support comprehension of the Information Booklet through the inclusion of diverse formats and learning guides. The Practitioners' Version contains instructions for practitioners seeking to facilitate participants' use of the Workbook.
- **Supplemental Workbook - Participant's Version** ([PDF](#), [Google Sheets](#)) - This Version contains all Supplemental Workbook Exercises in English.
- [Wiki \(including translated resources and Q&A\)](#) - Platform created to provide a repository of the learning resources for the Global Assembly and to act as a participatory platform to support collaborative information generation and translation.
- [Speaker and witness videos with subtitles](#) - Repository of all recorded videos submitted by speakers and witnesses to inform the learning phase of the Global Assembly.
- [Hand signals](#) - Nonverbal communication tool used in the Core Assembly to enable simultaneous and direct communication.

Roles

The following roles were present in the Core Assembly and are mentioned throughout this Facilitation Guide:

- **Assembly Member (AM)** - A participant of the Global Assembly's Core Assembly selected by global civic lottery. Their role was to deliberate with their peers on the framing question and co-produce recommendations, primarily in the form of the People's Declaration for the Sustainable Future of Planet Earth. They represented only themselves, but collectively approximated a descriptive sample of the global human population in terms of geography, age, gender, education and attitudes about climate change.
 - **Plenary Co-Facilitator** - An individual who served as the host of Plenary sessions. This role was shared between two people during the Core Assembly, hence the prefix "co".
 - **Breakout Facilitator (often referred to as Facilitator)** - A convenor of Breakout Group discussions. An experienced facilitation professional who's skills lie in their ability to lead, but not influence, constructive deliberations between Assembly Members, ensuring that all voices and perspectives are heard and respected equally.
 - **Editor** - An individual responsible for collating the outputs from Breakout Group deliberations and arranging them into distinct streams of consensus to be evaluated by all Assembly Members at a later date. This process is referred to as the "**Co-Creation Method**" and can be read in the Global Assembly Report, available at <https://globalassembly.org/>
 - **Notetaker** - An individual responsible for documenting the written record of Assembly Members' deliberations. They were also responsible for preparing the Miro boards for their Breakout Group before sessions and transferring key outputs to a format accessible to Editors after sessions, and provided technical support to the Breakout Group and general assistance to Breakout Facilitators when required.
 - **Community Host** - A community organization and its staff/representatives who were based near one of the points selected by the global location lottery. They performed the following roles: recruitment of potential Assembly Members for the Core Assembly, contextualization and translation of information materials, promotion of the Global Assembly, enabling participation of Assembly Members (including transportation, internet connectivity and computer access, live translation during sessions or provision thereof, technical support, payment). While often present during deliberations they served only as a conduit for Assembly Member participation and were instructed not to influence them in any way.
-

-
- **Speakers** - Expert speakers had the primary role of providing the Assembly Members with evidence in an accessible and engaging way and highlighting trade-offs to be discussed in the deliberation phase of the Assembly.
 - **Witnesses** - Following on from the experts speakers' presentations, the Assembly Members heard from witnesses who had a specific perspective or interpretation of the evidence, including perspectives gained from lived experience. Such witnesses included a range of people such as: representatives from advocacy groups, journalists, experts with a particular take on a topic, or the Assembly Members themselves.
 - **Knowledge & Wisdom Committee** - The purpose of the KWC was to ensure that the learning journey of all participants, both in the Core Assembly and Community Assemblies, were rooted in the best evidence available at the time. Members of the committee were selected as experts in their respective fields to bring a range of different perspectives on the climate and ecological crisis. Their areas of expertise covered: earth systems science, systems change, engineering and geoscience, original people's wisdom, decolonisation, ecology, climate Science, environmental economics, industrial ecology, climate adaptation, behavioral and cognitive psychology, and depth psychology. The committee informed decisions on the framing question that the Assembly deliberated on, the selection of the experts and witnesses and the content and design of the information materials and learning phase, in addition to answering Assembly Members' questions on the climate & ecological crisis throughout the Core Assembly.
 - **Global Governance & Participation Committee** - The purpose of the GGPC was to advise the Global Assembly delivery team on process and governance. Members of the GGPC were selected as experts in their respective fields to bring a range of different perspectives on: global governance, political theory, deliberative and participatory democracy, social change, anthropology, sociology and human rights. They answered Assembly Members' questions on climate & ecological governance and policy, including questions related to COP26, throughout the Core Assembly.
-

Values of Core Assembly Personnel

The following values were co-created by each respective group in the Core Assembly, as agreements to underpin their participation.

Hosting Circle Values

By and for Facilitators, Notetakers and Editors of the 2021 Core Assembly

1. **Servant leadership** - We recognize that the Hosting Circle is in service of the Assembly Members with humility and respect. We strive to elevate their voices and needs rather than our own.
2. **Adaptability** - We listen to and learn from the Assembly Members. We are attentive to their needs and concerns; we respond to them quickly and continually.
3. **Integrity** - We strive for neutrality by practicing integrity. We acknowledge our biases and privileges, and constantly reflect on their implications.
4. **Confidentiality** - We do not externalize our involvement or content of deliberation until the end of the Assembly, with a view to safeguard the safety of Assembly Members and practice servant leadership.
5. **Stewardship** - We prepare sufficiently for each session, understanding the aim of the meeting and its long-term goals, to be able to steer the group consciously.
6. **Duty of Care** - We demonstrate respect for what each Assembly Member has to offer with support, encouragement & empowerment rather than judgment.
7. **Lean into difference** - We recognize the diversity of worldviews in the Assembly, understand difference as space for dialogue and foster a safe space for all Members to contribute to the collective discourse

Assembly Member “Conversation Principles”

By and for the Assembly Members of the 2021 Core Assembly

1. **Commitment** - We are committed to a common goal: Taking care of our shared planet in order to restore and safeguard a healthy environment for both present and future generations. We will build a new global infrastructure to bring about the necessary transformations in our daily lives as well as our institutions.

2. **Focus on solutions** – We are motivated to find action-oriented solutions which directly and quickly address the problems of climate change and ecological crisis. We work together with passion and hope toward this goal.
3. **Active Participation** - We all engage actively in the deliberations to offer our unique contributions. We generously share with each other our diverse knowledge, experience, and insights.
4. **Honesty and trust** - We communicate our views openly and honestly. We foster trust between Assembly Members.
5. **Clarity** - We strive to express ourselves in a clear and straightforward manner. We are mindful of how we use language as well as the non-verbal cues.
6. **Active listening** - We listen to each other carefully and patiently. Everyone is given their fair share of time to digest new information and to express themselves without interruption. We make sure that everyone feels heard.
7. **Reflection** – We give due thought to the ideas proposed by other Assembly Members. We weigh different ideas based on their own merit and learn from one another. Mindful of our biases, we are open to revising our own views through exchange and consideration.
8. **Respect** - We are respectful of different views. We maintain a peaceful environment and voice disagreements politely.
9. **Safety** - We create a safe and comfortable space where everyone can open up their thoughts and feelings freely, without fear of judgment.
10. **Inclusion** - We embrace diversity and encourage each other to speak our minds in our preferred language. We support each other through empathy and inclusion.
11. **Friendship** - We seek to establish genuine bonds with our fellow Assembly Members. We create a friendly environment and bring joy, understanding, and togetherness to our conversations.

Facilitation Tips

The following guidelines were shared during weekly debriefs with Breakout Facilitators. While some are specific to the Global Assembly, they can be useful tips for facilitators of deliberative processes, and dialogues more generally.

1. **"Signposting"** - Ensuring that Assembly Members are aware of what they will be discussing, the flow of the session, when they will be taking a break, and how their work fits into the overall Global Assembly timeline.
2. **"Naming"** - Making sure that all the Assembly Members, Community Hosts/translators, and any Observers in the space have the correct Zoom name, and have a clear understanding of their role.
3. **"Contracting"** - Checking in with Assembly Members to ensure they understand and are comfortable throughout the session e.g. are you OK with the aim? The timings etc? Are you happy to move on? To go back to the main session? To discuss this proposed question?
4. **"Reflecting"** - Where useful, the skill of repeating what Assembly Members are saying back to them using different words, to ensure that they were understood correctly and to emphasize that they were listened to and that their statements were captured. This also supports the Notetakers and translators.
5. **"Circulating"** - Encouraging all Assembly Members to participate and contribute to the discussions, and seeking to encourage more deliberation and Assembly Members to Assembly Members dialogue. Also identifying connections between statements and perspectives shared by the Assembly Members to invigorate the dialogue.
6. **"Modeling"** - Serving as a good example of the "Conversation Principles," bringing love, respect and understanding into the room, speaking slowly and in such a way that translators can follow along, and using the hand signals.
7. **"Refereeing"** - Encouraging everyone to serve the correct role. In particular, that Community Hosts/translators are fulfilling their role in the best service of all Assembly Members (where needed, reminding them of the Participation Agreements).
8. **"Safeguarding"** - Modeling and refereeing are an important part of creating a safe and brave space. Also critical that Facilitators are non-judgmental and unbiased in their reflections and commentary, ensuring that all Assembly Members in their care feel important and respected.

October 7 - 13

1.1 Breakout

1.2 Plenary

1.3 Breakout

1.4 Breakout

Block

01

Objectives

1. Induction of the Assembly members (AMs)
2. Introduction about the Global Assembly (GA)
3. Introduction about the current climate & ecological situation
4. Introduction to global decision-making on biodiversity
5. Introduction to the impacts of climate and ecological changes

Outputs

1. Participation guidelines & expectations
2. Understanding of the Global Assembly
3. Induction to other Assembly Members
4. Understanding of the climate & ecological situation, the decision-making structure and biodiversity global governance
5. AMs' questions answered
6. Induction Survey & Session 2 Survey

Session 1.1B: October 7th, 2021

Session Overview

The Facilitator opens the session with a welcome message and a round of introductions. Following an icebreaker activity, overview of the Global Assembly and sharing of Hand Signals, the “7 Generation Journaling Exercise” invites Assembly Members (AMs) to indicate their families, over 7 generations, on a timeline, and begin sharing their diverse heritage via stories about their great grandparents’ lives. AMs return to this activity throughout the session, sharing about their current lives, then their hopes & dreams for their great grandchildren’s lives. AMs also begin generating inputs into their “Conversation Principles,” or norms. The session ends with a group letter-writing exercise to compose a message to their fellow Assembly Members, to be shared in the first Plenary session

Resources Used

Video: Introduction to the Global Assembly

5 min

Learning to say “Thank you” in each others’ language

- One by one- Member shares how to say “Thank you” in their language.
- Facilitator asks Community Host to type in phonetic spelling in english in the chat (ie. “An-Nyeong-Ha-Sae-Yo”)
 - Everyone tries to say it (on the count of 3)

Session Outputs

- Questions about the Global Assembly, to be answered asynchronously by Global Support Team
- Conversation Guidelines from all 20 Breakout Rooms, to be consolidated by Editor Team
- Letter to the Plenary from all 20 Breakout Rooms, to be shared at 1.2P
- **Induction Survey:** <https://globalassembly.org/Induction-Survey>

Workflow

Input-Output Spreadsheet (IOS)

At the end of each Core Assembly session, Notetakes copy recorded notes of Assembly Member interventions into a shared spreadsheet, called the **Input-Output Spreadsheet (IOS)**. This enables Editors to consolidate raw **Outputs**, such as the Conversation Principles, from multiple Breakout rooms into a shared document.

Similarly, Miro text needed for each session, such as answers to questions, are copied into the **Input** section by the Global Support Team.

Session 1.2P: October 9th, 2021

Session Overview

The session begins with a welcome from the Co-Plenary Facilitators, and representatives from 4 Breakouts share their group's letter to the Plenary. Before AMs transition into their Breakouts, they learn about the Co-Creation Method, or how the Editor Team has consolidated the outputs they generated on the Conversation Principles into a shared draft. In Breakouts, AMs review & submit comments which will be integrated by the Editors into a second draft.

In this session, AMs start their learning journey, completing Chapters 1 & 2 of the Information Booklet. Each chapter is accompanied by a Supplemental Resource exercise which supports understanding and prompts discussion on the content. These exercises bring back the AMs' "7 Generation Journaling Exercise," guiding the AMs to consider historical changes in climate & ecology in relation to their family timelines.

At this point, we're going to go back into our breakout rooms to start learning about the climate and ecological crisis

Transition to Breakout Rooms

13.10
35 min
**Begin to learn
& discuss the
climate crisis**

Breakout Rooms

Reading time for Chapter 1: What is the climate crisis? (±5 min)

AMs access the Information Booklet in different ways; some read translated versions, illiterate AMs are read the information by their Community Host.

Discussion (±5 min)

- How does this make you feel?
- Is there anything here you didn't know?
- Are there any questions that come to mind?

"Global Surface Temperature Change (1850-2020)" (±20 min)

- AMs' view their compiled "Breakout Intergenerational Timeline" on the Miro Board
- AMs' view "Change in Global Surface Temperature (1850-2020)" graph on the Miro Board
- Facilitator out loud "Recent History" passage below, pausing to allow translation

"Historically, changes in greenhouse gases and temperature were driven by non-human natural activities, such as the reflection of sunlight and volcanic eruptions (the green line below). Today, they are primarily driven by human activity (see the red line below)."

Since people in rich countries started to burn fossil fuels around 200 years ago, leading to huge quantities of greenhouse gases being put into the atmosphere, global surface temperatures have risen by 1.2°C (34.2°F) (see chart below). Although it doesn't sound like a lot, the last 20 years have been the warmest

period in more than 100,000 years. Can you see how the temperature is changing from your great grandparents to your life today?"

- D. AMs' journal reflections on how temperatures and life may have changed since their great grandparents were born. How have the weather and the seasons changed in the place where they live over this time?

Notetakers record reflections

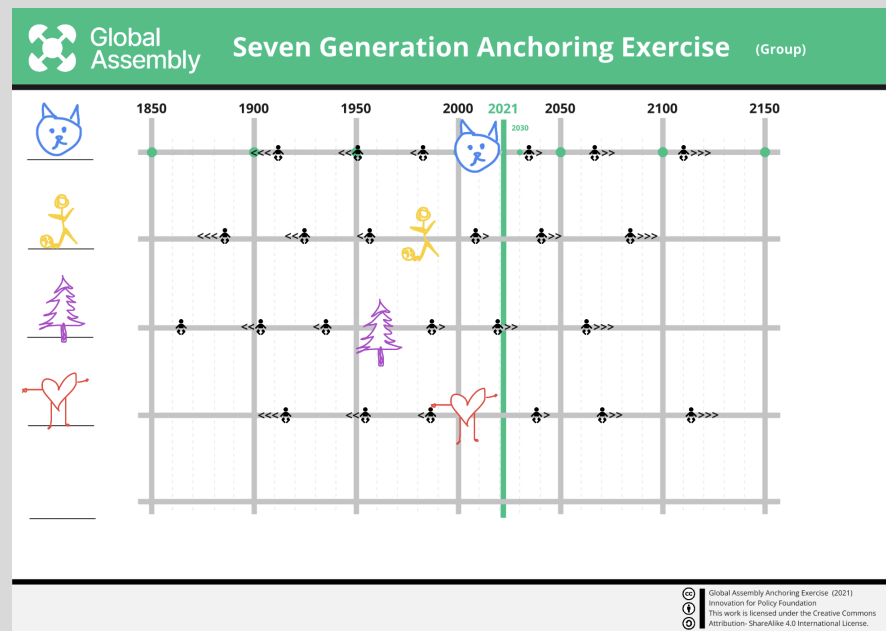

- E. Round of open sharing on reflections

AMs’ view “A story of interconnectedness” on Miro Board</p> <p>B. Facilitator reads out the following passage:</p> <p><i>“Certain butterflies always lay their eggs on a particular bush above the nest of a particular species of ant. The ants collect the eggs and take them down into the nest. When the larvae hatch the ants carry them up to eat the leaves of the bush at night and then carry them back down again. When the larvae grow too big to be carried out the ants venture out to collect the leaves for the larvae. The larvae grow a jelly on their sides when they eat those particular leaves, and this is the food that the queen ant eats. The larvae then spin cocoons in the nest for the final stage of the process, after which they fly out of the nest as butterflies and begin the cycle all over again.”</i></p>

“A Story of Interconnectedness”

Exercise”

Supplemental
Workbook Section
1.2iii

AMs view the illustrated comic strip on their Miro Boards, with automatic translations superimposed. Community Hosts translate orally as the Facilitator reads out the story.

C. AMs journal or reflect individually on the prompt:

In the short story above, can you imagine what would happen if either the bush, the ant, or the butterfly were to be threatened? Can you think of any examples of the connections between plants and/or animals in the place where you live? Have you observed some species relying upon each other (this could include humans)?

Exercise: “Species Abundance” (±15 minutes)

A. AMs view “Species Abundance” graph on the Miro Board

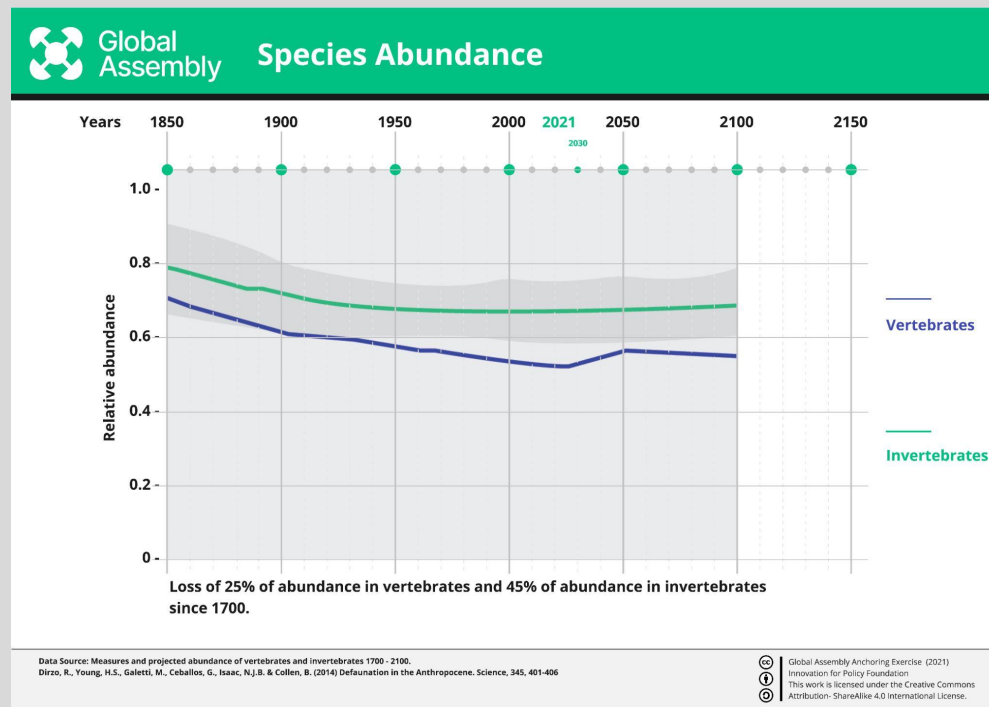

B. Facilitator reads the following passage:

“Vertebrates are animals that have a backbone inside their body, such as fish, birds and humans. Invertebrates are animals that don’t have a backbone, like worms or spiders. Consider the loss of abundance of vertebrates and invertebrates in the chart below. Can you see how the abundance of animals has decreased since your great grandparents’ lives? While not pictured on this graph, consider the fact that there was a loss of 25% of abundance in vertebrates and 45% of abundance in invertebrates since 1700.”

“Species Abundance” Exercise

Supplemental
Workbook Section
1.2iv.

AMs view the graph detailing decline in species abundance, with the 7 Generation Exercise superimposed.

C. Think back to the story about the ant and the butterfly. How do you think the loss of abundance

of one species might affect others? Take 5 minutes to journal about this.
Notetakers record questions & reflections
D. Round of open sharing on reflections

5 min

Plenary Main Room

- **Session 2 Survey:** <https://globalassembly.org/session-2-survey>
- Announcement: Unanswered questions will be answered in writing and available before the next session
- Open Mics for Goodbye in everyone's own language
- Music for closure

Session Outputs

- Session 2 Survey
- Questions about the material covered in this session, to be answered asynchronously by the Knowledge & Wisdom Committee (K&WC)
- Comments on Conversation Principles V1

Session 1.3B: October 12th, 2021

Session Overview

The session begins with a check-in and overview of the agenda. First, AMs read Chapter 3, exploring the causes of the climate & ecological crisis and the “worldviews” underlying recent human history & the Industrial Revolution. The reading is paired with an activity during which AMs compare the long vs. recent history of global surface temperature & atmospheric CO₂. Next, AMs read a sub-section of Chapter 2 on the role of indigenous people in conserving biodiversity, and reflect on dominant worldviews in their own communities.

Lastly, a reading of Chapter 4 section B, on the impact of biodiversity negotiations, is paired with an activity looking at the decline of Vascular Plant Species. Again, this data is explored in relation to AMs’ family timelines.

Resources Used

Information Booklet: Chapter 3

Information Booklet: Chapter 2, Subsection “The role of indigenous people in conserving biodiversity”

Miro: Global Temperature Change in Relation to Atmospheric CO₂ Concentration (*see 1.3i in the Supplemental Workbook*)

Miro: Plant Biodiversity Loss (*see 1.3iii in the Supplemental Workbook section*)

Time	Aim	Activity
12:00 20 min	Remind people of the objectives of the session and remind people of the framing question	Welcome and introduction to today’s session <ul style="list-style-type: none">• Check-in<ul style="list-style-type: none">○ Welcoming Members in their languages○ Ensuring that everyone is able to connect and feels comfortable.○ Renaming & Recording permissions○ Round of sharing on: How is everyone doing today?• Overview<ul style="list-style-type: none">○ Reminder of framing question: “How can humanity address the climate and ecological crisis in a fair and effective way?”

		<ul style="list-style-type: none"> At session 2: we began learning about the climate and ecological crisis. We learned about recent changes in global surface temperature and declines in biodiversity. Today, session 3: we are exploring a concept called “worldviews” and the connections between the climate and ecological crisis & global governance.
12:20 30 min	1. Read Chapter 3 2. Consider the existence of different world views 3. Personal reflections on their own worldviews.	<p>Introduction: What is a worldview? (± 5 minutes)</p> <p><i>“As we will read in this chapter, a worldview is a bit like a pair of glasses we use to see the world around us. Our worldview represents our core values and beliefs, and it shapes how we think and what we expect from the world. It’s influenced by our own personal experiences, the beliefs and values passed to us from our families and teachers, and the beliefs and values of the culture we grew up in. Our worldview affects how we see and act in the world.”</i></p> <p>Prompt for individual reflection: Can you think of a time when your worldview, or the way you see the world, changed?</p> <p>Reading time for Chapter 3: Causes of the climate & ecological crisis (± 10 minutes)</p> <p>Notetakers record questions & reflections</p> <p>Discussion 1: Industrial Revolution: Surfacing embedded trade-offs (± 15 minutes)</p> <p><u>Prompt questions:</u></p> <ul style="list-style-type: none"> After reading this chapter, can you describe the “worldview” at the heart of many high-polluting nations, that many believe has its roots in the Scientific Revolution and dominated during the Industrial Revolution? What do you think were the benefits and harms of the Industrial Revolution (trade offs)?
12:50 30 min	1. Observe temperatures in long history & note changes in recent history	<p>Long History Exercise (± 15 min)</p> <p>A. Facilitator reads out the following passage:</p> <p><i>“Modern humans - Homo Sapiens, our species and our common ancestors - first emerged on the African continent around 300,000 years ago. At this time, there were lower, more stable global surface temperatures than there are today. In these conditions our ancestors flourished, and around 55,000 years ago (roughly 2,200 generations before us today*) they began a great migration that led to</i></p>

2. Open sharing

humans spreading across the surface of the earth. Scientists can estimate historical conditions on the earth, long before humanity existed.”

*Assuming an average generational gap of 25 years.

B. Members view “Global Surface Temperature & Atmospheric CO₂” graph on Miro Board, paired with the following passage:

“Do we all remember reading about global surface temperatures and greenhouse gasses, like carbon dioxide, on Saturday? Throughout history, there has been a strong relationship between the levels of greenhouse gasses, such as carbon dioxide, and temperatures on the earth. The red line in this graph is showing the changes in the temperature of the earth’s surface and the black line is showing changes in the amount of carbon dioxide in the atmosphere. During times when greenhouse gasses have increased, temperatures have also increased. At other times when greenhouse gasses are reduced, temperatures are also lowered.”

Global Temperature Change in Relation to Atmospheric CO₂ Concentration

Supplemental Workbook Section 1.3i.

C. AMs view “Global Surface Temperature” graph on Miro Board, with the following passage:

“Now what we’re seeing on the left are changes in global temperatures over the past 800,000 years. On the right is the last 1000 years, which would fit into a tiny speck at the end of the graph on the left. After the long steady period which allowed our ancestors to thrive, we can see that temperatures have started to rise unusually quickly since the Industrial Revolution, as we just read about in the chapter of the Information Booklet. All of the generations in our families, starting from our great grandparents, are shown. One thing that can be observed from this is that the last time that global temperatures were this high over a multi-year period was more than 100,000 years ago. Another important observation for you to know is that carbon dioxide concentrations today are at their highest point in 2 million years, greater than at any point in our 300,000 years of human history.”

Global Surface Temperature & Atmospheric CO₂

Supplemental Workbook Section 1.3ii

AMs review 2 graphs detailing Global Surface Temperature Change arranged side-by-side; the left shows data from 800,000 thousand years ago to now, and the right, from years 1000-2000.

		<p>Notetakers record questions & reflections</p> <p>D. Round of open sharing on reflections - Can I invite you to share with each other how this makes you feel?</p>
13:20 10 min	Break	
13:30 45 min	<p>1. Understand interconnectedness between humans and the environment as a worldview</p> <p>2. Articulate dominant worldviews in our own communities</p>	<p>Notetakers record questions & reflections</p> <p>Discussion: Interconnectedness of humans and the environment (±20 min)</p> <ul style="list-style-type: none"> Recall the example from Saturday of different species relying on each other, like the ant and the butterfly. In what ways are humans and the environment interconnected and interdependent? Share examples from your own communities of how humans rely on nature. <p>Read Info Booklet Chapter 2 Subsection: The role of indigenous people in conserving biodiversity (±5 min)</p> <p>Notetakers record questions & reflections</p> <p>Journal & Discussion: Dominant worldviews in our communities (±20 min)</p> <ul style="list-style-type: none"> AMs journal or reflect individually about dominant worldviews in <i>their</i> community, reflecting on the different types of worldviews they discussed earlier. Share out in a circle
14:15 45 min	<p>1. Read Chapter 4 Section B</p> <p>2. Understand example of biodiversity loss (vascular plant species)</p>	<p>Exercise: "Plant Biodiversity Loss" (±10 minutes)</p> <p>A. AMs view "Plant Biodiversity Loss" graph on Miro Board</p> <p>B. Facilitator reads out the following passage:</p> <p><i>"Do you remember learning about the ecological crisis on Saturday? We learned that one million of the world's estimated eight million species of plants and animals are threatened with extinction. This graph is showing us the loss, or extinction, of vascular plant species from 1900 to today. Vascular plants are a type of plants that comprise 90% of all vegetation on earth, including all plants that have seeds. In 1900, around 97.3% of plant species still existed. Around 10,000 species of plants were extinct. Today, around 95.7% of plant species exist. This means that around 6,000 plant species that</i></p>

existed in 1900 no longer exist today. In total, around 16,000 species of plants that existed on earth can no longer be found today."

Reading time for section 4B "What have biodiversity negotiations achieved so far?" (±10 minutes)

Notetakers record questions & reflections

Open discussion (±25 minutes)

Prompt questions:

- Was there anything you didn't understand?
- What, if anything, stood out to you from this section?

🌱 Plant Biodiversity Loss

Supplemental
Workbook Section
1.3iii

AMs review the graph detailing Plant Biodiversity Loss between 1850 to today. The date-of-birth of their & fellow AMs' family members, superimposed on the graph are meant to support understanding.

15.00	Close session
-------	---------------

Session Outputs

- Questions about the material covered in this session, to be answered asynchronously by the Knowledge & Wisdom Committee (K&WC)

Session 1.4B: October 13th, 2021

Session Overview

The session begins with a check-in and overview of the agenda. First, AMs are given additional time to review & comment on the first draft of the consolidated Conversation Principles. Next, AMs transition to exploring the linkage between different degree rises and projected impacts of climate change in temperature, drought, precipitation and more. A reading & discussion of Chapter 5 introduces additional impacts on human health, ecosystems & marine life. This is followed by an exploration of the varied geographic impacts of degree rises. Viewing maps simulating warming & precipitation changes at 1.5, 2 and 4 degrees temperature rise scenarios, AMs reflect on how their own & their peers' communities may be impacted.

Resources Used

Miro: Response of the climate system relative to 1850-1900 (*see 1.4i in Supplemental Workbook*)

Information Booklet: Chapter 5

Miro: Annual mean temperature & precipitation change relative to 1850-1900 at 1.5°C, 2°C and 4°C global warming (*see 1.4ii in Supplemental Workbook*)

Time	Aim	Activity
12:00 20 min	1. Welcome AMs into the session 2. Introduce session agenda	Welcome and Intro <ul style="list-style-type: none">• Check-in<ul style="list-style-type: none">◦ Welcoming Members in their languages◦ Ensuring that everyone is able to connect and feels comfortable.◦ Renaming & Recording permissions◦ Round of sharing on: How is everyone doing today?• Overview<ul style="list-style-type: none">◦ In 1.3, we explored “worldviews” and how some worldviews can contribute to the causes of the climate and ecological crisis. We also looked at global decision-making

		<p>around biodiversity and considered the example of the loss of plant species.</p> <ul style="list-style-type: none"> Today, we are going to transition to explore the various <i>impacts</i> of climate change and biodiversity loss.
<p>12:20 20 min</p>	<p>1. Generate contributions on Conversation Principles V1</p> <p>2. Discuss how to practice Principles</p>	<p>Conversation Principles V1 Workshop</p> <p>Notetaker records AMs' comments</p> <p>Commenting on conversation principles, if they weren't sufficiently reviewed in 1.2P.</p> <p>If Breakout sufficiently reviewed in 1.2P Members can begin to discuss concrete ways in which we practice the principles.</p>
<p>12:40 15 min</p>	<p>1. Introduce the linkage between different degree rises and varied impacts of climate change</p>	<p>Introduce different degree rises scenarios</p> <p>A. Share introduction</p> <p><i>"In the last 2 sessions, we have been learning about how the temperature of the earth is rising. One way of thinking about the impacts of climate change is what will happen as a result of different temperature rises in the future. The next exercise shows how different average temperatures will change instances of extreme heat, drought, rainfall, snow and tropical cyclones."</i></p> <p>B. Screenshare / invite CH with printed PDFs to open "Response of the climate system relative to 1850-1900"</p> <p>C. Read the following passage</p> <p><i>"This slide is showing us how the estimated changes in temperature, drought, precipitation, snow and tropical cyclones will change as temperatures of the earth rises to certain degrees. In the first row, we can see that as the temperature of the earth's surface rises, the hottest day in 10 years will become hotter and hotter. In the second row, we can see that a drought that used to occur once in a decade now happens two times more frequently. If the temperature of the earth's surface rose to 4 degrees, droughts would happen around 5 times more frequently. Can you observe similar changes in precipitation, snow and tropical cyclones? Notice how the different changes of the temperature of the</i></p>

earth's surface, which can seem small, can cause very different changes in things we feel in our daily lives, like the rain and how hot it is. During this session, we will review Chapter 5 of the information materials to look at more of the concrete impacts of these changes in the temperature of the earth's surface."

Responses of the climate system

Supplemental
Workbook Section
1.4i

Response of the climate system relative to 1850-1900

	+1.1°C Today	+1.5°C	+2°C	+4°C
Temperature Hottest day in a decade (°C)	+1.2°C (+1.0 - 1.4 °C)	+1.9°C (+1.5 - 1.9 °C)	+2.6°C (+2.0 - 2.8 °C)	+5.1°C (+4.6 - 5.0 °C)
Drought A drought that used to occur once in a decade now happens x times more	X1.7 (0.7 - 4.1)	X2.0 (1.0 - 5.1)	X2.4 (1.3 - 5.8)	X4.1 (1.7 - 7.2)
Precipitation What used to be the wettest day in a decade now happens x times more	X1.3 (1.2 - 3.1)	X1.5 (1.5-1.6)	X1.7 (1.6 - 2.0)	X2.7 (2.3 - 3.6)
Snow Snow cover extent change (%)	-1% (-2 - 0)	-5% (-5 - -1)	-9% (-12 - -4)	-25% (-31 - -18)
Tropical cyclones Proportion of intense tropical cyclones (%)		+10%	+13%	+30%

Why? • Do you have any questions about the reading?
13:20 30 min	1. Reading & discussing Chapter 5 sections 4 & 5	<p>Chapter 5: Impacts on Land based biodiversity & ecosystems + Oceans & marine life</p> <p>A. Reading time for Land based biodiversity & ecosystems + Oceans & marine life (± 10 min)</p> <p>B. Open discussion (± 20 minutes)</p> <p>Notetaker records AMs' contributions & questions</p> <p><u>Prompt questions:</u></p> <ul style="list-style-type: none"> • How does this reading add to what we have been learning about the interconnectedness of different species? • Do you have any questions about the reading?
13:55 10 min	Break	
14:05 20 min	1. Surface different or similar ways in which Members experience climate change in their personal lives	<p>Notetaker records AMs' contributions & questions</p> <p>Discussion: Connecting lived experience</p> <p>The purpose of this discussion is to embed understanding of climate change and its impacts, from what the members have heard and their own lived experiences.</p> <p><u>Prompt questions:</u></p> <ul style="list-style-type: none"> • How does what you've heard and read fit with your own lived experience wherever you are in the world ?

or communities	<ul style="list-style-type: none">• Was there anything in the reading about your corner of the world that you didn't know before? How did it make you feel?• Are there any personal stories you would like to share about how you or others in your community experience climate change?• What, if anything, particularly resonated with you?• What, if anything, didn't resonate with you? <p>*At this point, Facilitator mutes themselves, and only steps in to support the conversation (ie. "We haven't heard from __ yet, would you like to share?")</p>
----------------	--

14:25
30 min

1. Understand that impacts of CC vary geographically through personal stories

2. Understanding that impacts of CC vary geographically, and that these differences are also amplified with different degree rise scenarios

Understanding varied geographic impacts of degree rises

A. Screen share/Invite CH to open graph of “annual mean temperature change” and “annual mean precipitation change” relative to 1850-1900: Simulated change at 1.5C global warming”

“This map is showing how different land and ocean areas will experience degrees of warming differently, at 1.5 degrees of global warming. Notice that rising global temperatures do not mean that all areas experience the same level of warming. Different parts of the world will warm more or less than others. In general, land areas warm more than our oceans. The Arctic and Antarctica, shown at the top of this map, is estimated to warm more than the Tropics. The blue pins on this map show the 100 locations around the world where our Global Assembly Members come from. We can see that each of us will experience different levels of warming in the places where we live, at 1.5 degrees of global warming.”

The map below is showing how precipitation, like rain or snow, is estimated to increase or decrease at 1.5 degrees of global warming. Similar to temperature, different parts of the world experience different levels of changes in precipitation. Precipitation is estimated to increase over areas of the world near the top of the map, around the equator of the Pacific and regions known to experience monsoons, such as around the Indian ocean and around the Northern part of Africa. In other places, notice that precipitation is decreasing. As we read, these changes in precipitation can lead to droughts or floods. As we continue to look at these maps, try to find where the places where you and your 4 peer Assembly Members live are on the map, and think about how they are being affected. Can everyone see the place where they live, and maybe some of the places where others in our group are from?”

Throughout this session, we have been learning about how the impacts of climate change will change depending on how many degrees the temperature of the earth rises by. We have just looked at how 2 impacts of climate change - how hot it is and the amount of precipitation - will be felt differently depending on where you are in the world. Now, we are going to combine these two pieces - changing impacts as a result of degree rises and geography - together”

- B. Screen share/Invite CH to open graph of “annual mean temperature change relative to 1850-1900 : Simulated change at 2C global warming”

“These maps are showing how different land and ocean areas will experience degrees of warming, and changes in precipitation differently, at 2 degrees of global warming. Notice how in general, nearly all areas will experience warmer temperatures than at 1.5 degrees of global warming, including the areas that experience relatively less warming. Next, let’s notice the ways in which areas like the Arctic and Antarctica, that would have experienced the most warming at 1.5 degrees, are getting warmer in this scenario”

- C. Screen share/Invite CH to open graph of “annual mean temperature change relative to 1850-1900 : Simulated change at 4C global warming

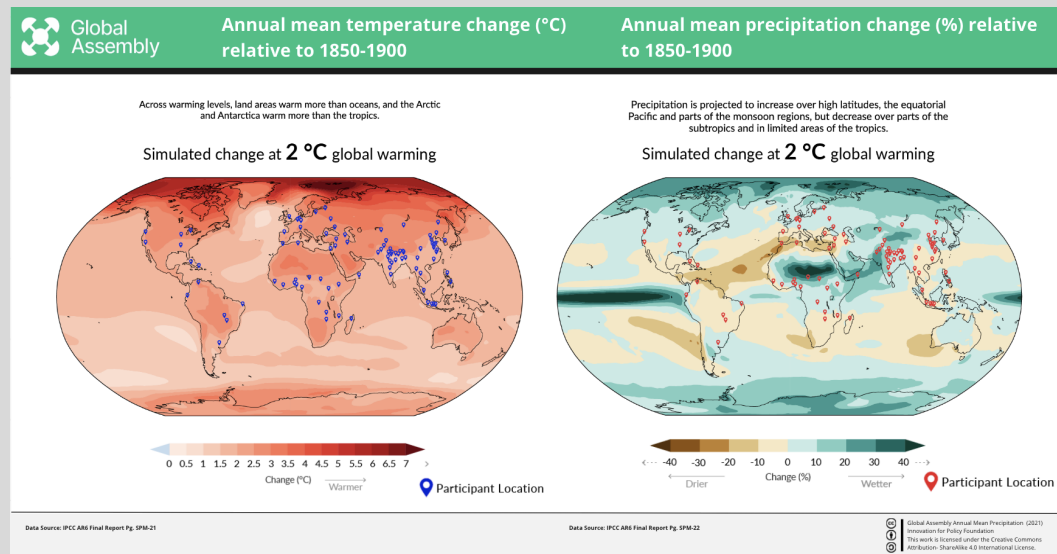

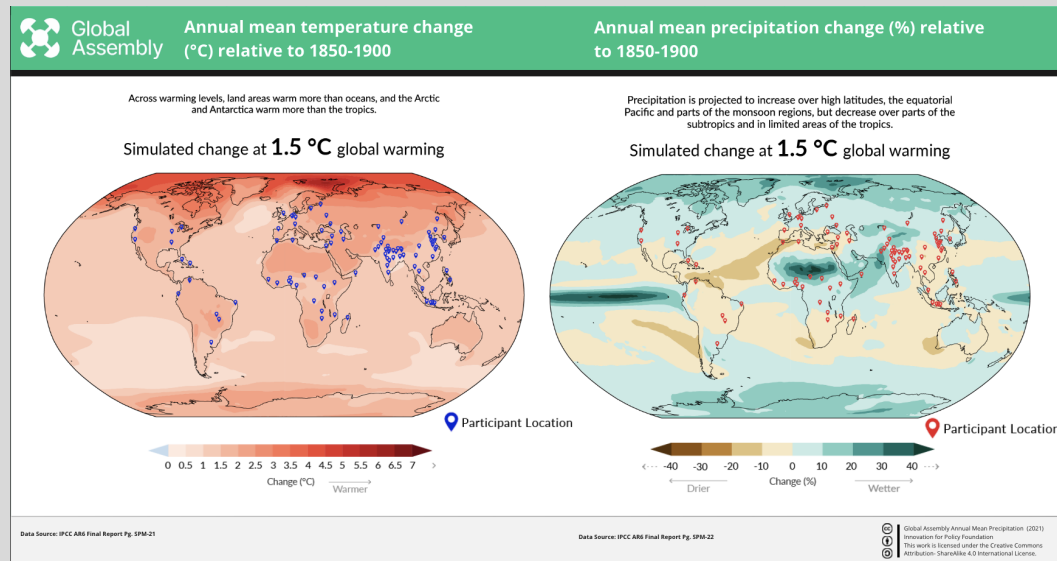

“Finally, this map is showing how different land and ocean areas will experience degrees of warming, and changes in precipitation differently, at 4 degrees of global warming. If we reach 4 degrees of global warming, many of the places that were estimated to experience relatively less warming at 1.5 degrees, are experiencing the same, if not more, warming than the Arctic and Antarctica at 1.5 degrees. If we reach 4 degrees of global warming, many of the places that were estimated to experience relatively less severe droughts and floods at 1.5 degrees, are experiencing droughts and floods as severely as the most affected areas at 1.5 degrees.”

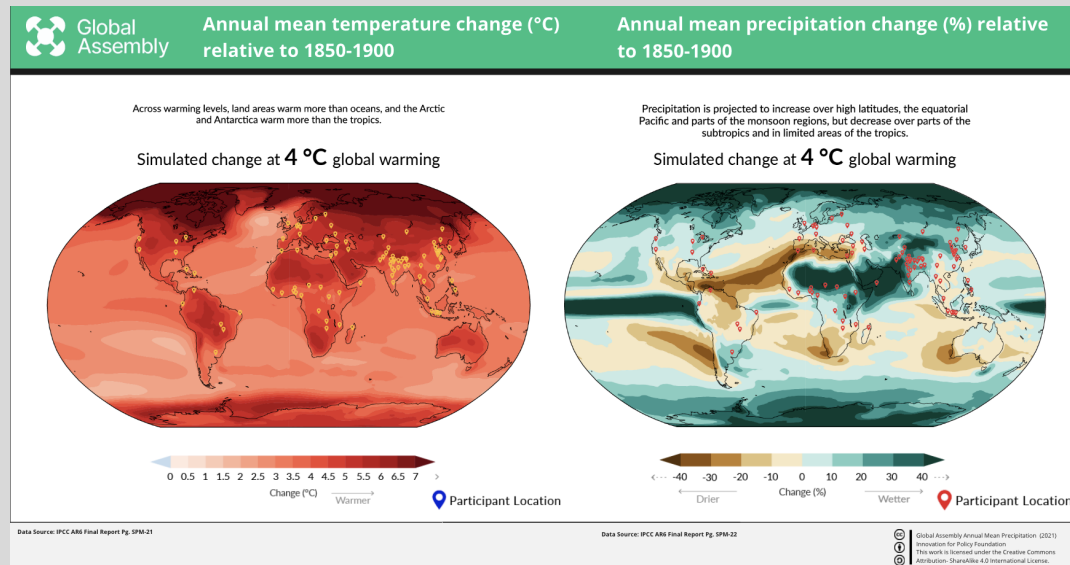

**Continued
below.**

☞ **Annual mean
temperature &
precipitation
change relative
to 1850-1900**

*Supplemental
Workbook Section
1.4ii*

Simulated annual mean warming & precipitation change are displayed side-by-side, for 1.5, 2 & 4 degrees C. In this activity, AMs view these graphs sequentially, accompanied by the scripted explanation.

D. Open Discussion

Notetaker records AMs' contributions & questions

Prompt questions:

- How does this make you feel?
- What do these maps tell you about how the temperature or precipitation will change in the place where you live?
- Have you experienced any of these impacts in your own life?
- After seeing how different degree rises may affect different Members of our Assembly, do you have any reflections to share?

15:00

End

Wrap-up

- Congratulate members for reaching the end of Block 1! Throughout this Block, we learned about the different causes and impacts of the climate and ecological crisis.
- Tomorrow, we will transition to Block 2, going deeper into the different scenarios caused by temperature rises we *started* looking at and starting to learn about the different ways we can

address the climate and ecological crisis.

Session Outputs

- Questions about the material covered in this session, to be answered asynchronously by the Knowledge & Wisdom Committee (K&WC)
- Additional comments on Conversation Principles V1 are shared with the Editors via the Input-Output Spreadsheet to be consolidated into a second draft

2.4Breakout

Block

02

Objectives

1. Introduction to global decision-making on climate
2. Introduction to different temperature rise scenarios & pathways for reducing emissions
3. Deliberate on targets and future vision
4. Discuss fairness and effectiveness
5. Deliberate on "environment as a right"
6. Begin to produce co-created inputs for COP26 Submissions

Outputs

1. Voting on Conversation Principles
2. AMs' questions answered by the Knowledge & Wisdom Committee

Session 2.1B: October 14th, 2021

Session Overview

After a check-in and overview of the agenda, AMs read Chapter 6A on climate models & projected changes in greenhouse gas emissions & atmospheric temperature. The reading is paired with exercises which introduce projected future simulations, as per IPCC scenarios, of two historical graphs they explored previously: global surface temperatures & vascular plant biodiversity. Next, AMs read Chapter 4A on climate negotiations before the Facilitator presents an overview of the relationship between the GA & COP26. AMs' individual preferences on whether they would like to speak on behalf of the GA at COP26 are recorded. Afterwards, AMs read Chapter 6 of the information booklet on tradeoffs, assumptions about negative emissions & tipping points. During the accompanying exercise, AMs study and discuss two tables respectively detailing the drivers & consequences of 3 IPCC Shared Socioeconomic & Environmental Pathways. Using these resources, AMs begin to understand & discuss the complex tradeoffs and impacts associated with different future scenarios.

Resources Used

Information Booklet: Chapter 6

Miro: "Global surface temperatures relative to 1850-1900 - Continued" (*See 2.1i in the Supplemental Workbook*)

Miro: "Vascular Plant Biodiversity - Continued" (*See 2.1ii in the Supplemental Workbook*)

Information Booklet: Chapter 4

Miro: "Shared socioeconomic and environmental pathways: Drivers & consequences of potential future pathways" (*See 2.1iii in the Supplemental Workbook*)

Time	Aim	Activity
12.00 30 min	1. Provide opportunity for AM to reflect on their	Recap <ul style="list-style-type: none">• Block 1: We started our learning journey, beginning to understand what the climate and ecological crisis is, the causes and various worldviews behind it and looking at how impacts change depending on the degrees of global warming. We also started looking at how these impacts are felt differently depending on where we are in the world. Finally, we began learning about global

<p>experience of the process so far</p>	<p>decision making on biodiversity.</p> <ul style="list-style-type: none"> • Block 2: We will continue to explore different temperature rise scenarios and pathways for how we can address the crisis. We will dig deeper into the framing question of our Assembly: “How can humanity address the climate and ecological crisis in a fair and effective way” by discussing what fairness and effectiveness means. • Block 2 Aim: By the time we come to the end of Block 2 next Wednesday, we will have started to decide, together, what future targets we want the world to reach and the actions that need to be taken to achieve this target. <p>Aim of today's session: Today, we are going to get a big picture of the different future scenarios that lie ahead so that we can begin thinking about which one of these scenarios we prefer.</p> <p>Circling back: Reflections on future visions</p> <ul style="list-style-type: none"> • AMs recall the visions they shared for their great grandchildren in 1.1B & reflect on how their visions have changed throughout deliberation • After hearing from all, AMs identify similarities between their visions to draft a <i>shared</i> vision for all of their great grandchildren
<p>12.30 40 min</p> <p>1. Understand 5 scenarios, or climate models by reading Chapter 6A & seeing global surface temperature s chart</p> <p>2. See example of how loss of</p>	<p>Introduction: What is a model?</p> <p>Facilitator reads out the following passage:</p> <p><i>“Scientists and experts try to predict what humanity’s future will look like using something called ‘Climate models’. Climate models” are sophisticated computer simulations that are used to analyze the future impact of changes in greenhouse gas emissions, such as carbon dioxide, on the Earth’s climate. In Block 1, we learned about the increase in greenhouse gas emissions since the Industrial revolution, and the following rise in global surface temperatures and looked at the different impacts of these temperature rises. We started considering how these impacts can change, or increase, depending on how much the temperature of the earth rises. The ‘Climate models’ we will look at today go deeper into these predictions.”</i></p> <p>Reading time for Chapter 6A: Climate models & projected changes in greenhouse gas emissions and atmospheric temperature (A) (± 5 mins)</p> <p>Exercise: “Global surface temperatures relative to 1850-1900 - Continued” (± 5 mins)</p>

plant biodiversity is projected to play out in 2 scenarios

- A. AMs view graph on Miro Board
- B. Facilitator reads out the passage below:

"This graph is showing us how the temperature of the earth will change in the next 100 years, for each of the scenarios we just read about. These scenarios were identified by the IPCC, or Intergovernmental Panel on Climate Change, an intergovernmental body of the United Nations that provides objective scientific information on human-induced climate change, its natural, political, and economic impacts and risks, and possible response options. Notice that the temperature of the earth will increase from today in all of the scenarios, from 'Scenario 1 Very Low' emissions to 'Scenario 5 Very High' emissions. In Scenario 1 and 2, the temperature is predicted to rise, then come back down around 2100, when many of our great grandchildren will be alive. In Scenarios 3, 4 and 5 temperatures are expected to continue rising by the time we reach 2100."

See Reference of "Global surface temperatures" Supplemental Workbook Section 2.1i

This graph shows 5 future simulations to the same global surface temperatures graph AMs studied in 1.4B.

Exercise: “Loss of Vascular Plant Biodiversity”

- AMs view graph on Miro Board
- Facilitator reads out the following passage

“We learned in 1.3B that between 1900 and today, around 6000 plant species went extinct. The blue dotted line predicts how many species of plants will go extinct by 2050 at Scenario 2, or ‘Low’ emissions scenario. Around 5,8000 plant species are predicted to be extinct by 2050 if the earth’s temperature warms between 1.3-2.4°C by 2100. The red dotted line predicts how many species of plants will go extinct by 2050 at Scenario 5, or “Very high” emissions scenario. Around 76000 plant species will be extinct by 2050 if the earth’s temperature warms between 3.3-5.7°C by the end of the century. Although the changes in the earth’s temperature between the ‘Low’ and ‘Very high’ scenario might seem small, it means a difference of 20,000 more species committed to extinction. Further, regardless of whether it is for the “Low” or the “Very High” scenario, the expected extinction of plant species is too severe in either case to fit into our original graph. We need to add on 3 more panels for us to see this on the graph.”

<p>14.20 40 min</p> <p>1. Understand drivers and consequences of each scenario</p> <p>2. Surface implications behind each scenario</p>	<p>Exercise: "Future Pathways"</p> <p>A. AMs view "Shared socioeconomic and environmental pathways: <u>Drivers</u> of potential future pathways" table on Miro Board</p> <p>B. Facilitator reads out the passage below & reads out the text in the table:</p> <p><i>"This table shows us the 'set' of social, political and economic actions needed to reach three of the IPCC scenarios we looked at in the beginning of the session. As a reminder, the IPCC is the intergovernmental body of the United Nations that provides objective scientific information on human-induced climate change, its natural, political, and economic impacts and risks, and possible response options. The three scenarios we will look at actions for are 1, 3 and 5 or the 'very low', 'intermediate' and 'very high' emission scenarios. Taken together, each group of social, political and economic actions needed to reach a scenario can be called one 'Pathway' for our future. Note that by the IPCC's predictions, we will only reach the Paris Targets if we can commit to the "Very low" scenario, and therefore only if we can commit to all of the social, economic and</i></p>

3. Identify a preference and explain why

political actions on the “Scenario 1” row in green at the bottom. Even if we commit to Scenario 1, we are not projected to keep global warming to 1.5 degree rise.”

See Reference of “SSPs: Drivers of potential future pathways” *Supplemental Workbook Section 2.1iii*

The Facilitator goes through each scenario, reading out the drivers collectively simulated to arrive at that scenario, to support understanding.

Global Assembly Shared Socioeconomic and Environmental Pathways Drivers of potential future pathways						
Scenario	Global Cooperation	Trade	Land use	Energy use	Consumption	Diet
Scenario 5 (very high emissions)	International cooperation on climate action is delayed, though there is strong global coordination on economic development and living standards improve worldwide.	International trade expands, and trends towards globalization continue.	Tropical deforestation continues, although at slowly declining rates.	Government policies continue to be supportive of fossil fuel use, and our economies continue to be reliant on coal and oil.	High material consumption	Meat rich diets
Scenario 3 (intermediate emissions)	The world follows a path in which social, economic, and technological trends do not shift much from historical patterns. This scenario is broadly aligned with the current Nationally Determined Contributions (NDCs).	Continuation of existing trading patterns, subsidies and tariffs.	Tropical deforestation continues, although at slowly declining rates.	Continued reliance on fossil fuels	Medium material consumption	Moderate meat consumption
Scenario 1 (very low emissions)	Strong global coordination and good governance, with investments in inclusive development, education, health and renewable energy. Global goals on human development and the environment (the Sustainable Development Goals) are achieved.	Abolishment of import tariffs and subsidies on agriculture. More reliance on regional markets, and less on global trade.	Strong regulation on land use, protecting biodiversity and forest cover.	There is a transition towards clean energy. Fossil fuel use is reduced through restrictive public policies.	Low material consumption	Shift towards lower meat consumption, plant-based diets and lower food waste.

D. Facilitator reads out the text in the table

See Reference of “SSPs: Drivers of potential future pathways”
Supplemental Workbook
Section 2.1iii

The Facilitator goes through each scenario, reading out the simulated consequences of that scenario, to support understanding

 Global Assembly Shared Socioeconomic and Environmental Pathways Consequences of potential future pathways			
Scenario	Emissions	Temperatures	Weather & Migration
Scenario 5 (very high emissions)	Emissions continue rising, doubling before 2050, and peak towards the end of the century.	In 2041–2060, the best estimate is 2.4°C In 2081–2100, the best estimate is 4.4°C (± 0.4°C)	Major 10-year drought events become 9.4-times more frequent, and 10-year rains are 2.7 times more frequent at 4°C. In these weather and climatic conditions, scientists have estimated that roughly 2.76bn people will be displaced.
Scenario 3 (intermediate emissions)	Emissions peak around 2040 and net zero is achieved around 2095.	In 2041–2060, the best estimate is 2°C. In 2081–2100, the best estimate is 2.7°C	Major 10-year drought events become 5.6-times more frequent, and 10-year rains are 1.7 times more frequent at 2°C. This gets worse with every fraction of a degree rise. In these conditions, scientists have estimated that roughly 2.12bn people will be displaced.
Scenario 1 (very low emissions)	Emissions peak now, and decline to reach net zero by the middle of the century.	In 2041–2060, the best estimate is 1.6°C. In 2081–2100, the best estimate is 1.4°C.	In this scenario temperatures are expected to rise beyond 1.5°C, and we would experience more extreme weather events than we're already experiencing today. As we've learned, there are further risks associated with each of these scenarios if any of several tipping points are breached.

Session Outputs

- Questions about the material covered in this session, to be answered asynchronously by the Knowledge & Wisdom Committee (K&WC)
- Breakout's preference on a future scenario

Session 2.2P: October 16th, 2021

Session Overview

The session begins with a welcome from the Co-Plenary Facilitators, followed by a share-out from 4 representatives on their breakouts' discussion on Future Visions. Then, AMs listen to words of support from COP26 President Alok Sharma & UN Secretary General Antonio Guterres. In Breakout Rooms, AMs read and discuss Chapters 7 & 9, on actions already being taken and how they are simulated to impact future visions.

After a presentation by the Global Support Team on the co-production & decision rule of the GA, AMs review the newly consolidated Conversation Principles V2 and cast their vote to ratify the draft.

The session ends with additional time in Breakout Rooms to review the "Drivers & consequences of potential future pathways" and discuss AMs' preferences for particular pathways.

Session 2.3B: October 16th, 2021

Session Overview

After a check-in and overview of the agenda, the session begins with a recorded presentation on fairness principles in the context of the climate & ecological crisis, from Speaker Farhana Yamin. AMs discuss the presentation, starting with a set of prompt questions shared across all Breakout Rooms, before transitioning to open discussion.*

The following session slot is self-curated by each Breakout, to review or discuss learning materials they have not had sufficient time to engage with. Next, AMs continue their discussion on Future Pathways, in the context of Farhana Yamin's presentation and reflections on the Paris Agreement.

*From 2.3B, AMs' contributions in deliberation are recorded by Notetakers for the purpose of serving as inputs into the AMs' COP Submissions. This is because all Information Material and Supplemental Workbook content has been covered by the end of 2.2P.

		Intro

	<ul style="list-style-type: none"> • At plenary: We voted to approve our Conversation Principle, which we all collectively contributed to. Now we will start to co-produce submissions to the United Nations and governments at the UN Climate Conference. • Today: We have officially reviewed all chapters of the Information Booklet, and supplemental learning resources, though will also have time today to catch up on any reading or learning that we didn't get to in our previous sessions, and review all that we've learned. We will watch our first Speaker, Farhana Yamin, who will present on fairness principles. We will return to the scenarios during this session to continue surfacing trade offs behind them and discuss the Paris Agreement. You will begin generating inputs into your Submission(s) to COP26, starting in your deliberations today.

Discussion Continued: Future Pathways

Review “Shared Socioeconomic and Environmental Pathways” materials & continue deliberation in the context of Fairness discussion & Farhana Yamin’s presentation.

A. Facilitator provides context for the discussion with the following passage:

“These scenarios were developed to support you in choosing a vision for the future. They combine a set of potential collective actions with their potential impacts on the environment and our future quality of life. These are just three pathways, of the infinite potential pathways we can take. And, these scenarios are global descriptions, which do not capture the important national and regional differences in distribution. For instance, the difference between personal diets in the scenarios relates to the amount of land used globally for raising animals for food. If less meat is consumed globally, then less land is allocated inefficiently for the production of animals and there will be less greenhouse gas emissions. However, what this does not specify is which countries, continents or individuals should change their personal diets, and to what extent. When considering these scenarios again today, It is important to reflect upon our recent learnings. For example, we learned about “tipping points”: that temperatures may rise much faster than these models predict. Secondly, we also learned that these models assume “removal” of greenhouse gasses from the atmosphere using technologies that are currently unproven. With this in mind, could I invite you to discuss which of these scenarios is consistent with your visions for our great grandchildren?”

Notetaker records AMs’ contributions & questions

B. Open discussion

Prompt questions:

- After listening to the speaker, do you have anything you would like to add to the question: Why might someone choose one of these scenarios over another?

	<ul style="list-style-type: none"> • After listening to the speaker, how do you feel about the preference you indicated at the end of our session on Thursday? • Do you believe that the world needs to fulfill the Paris Agreement to keep temperatures below 1.5c?
14:55 End	

Session Outputs

- Questions for Speaker: Farhana Yamin's presentation
- Inputs into the COP Submissions

Session 2.4B: October 20th, 2021

Session Overview

After a check-in and overview of the agenda, AMs watch a recorded presentation on the impact of climate change in small island states by Witness Vaine Wichman, from the Cook Islands Council of Woman. After a discussion surfacing initial reactions on the presentation, AMs continue their discussion on fairness principles.

Next, AMs read and discuss the Universal Declaration of Human Rights. This is followed by a recorded presentation from Witness Saad Alfarargi, the UN Special Rapporteur, on the right to development & considerations of equity in addressing the climate crisis. The session concludes with a summary discussion on the UDHR, and the intersection of climate & human rights, such as the inclusion of a right to a clean, healthy & sustainable environment in the UDHR.

Session 3.1B: October 21st, 2021

Session Overview

In this session, AMs learn and discuss rights frameworks related to the climate & ecological crisis. First, they review the political agreement on the resolution to consider the right to a clean, healthy and sustainable environment as a universal human right. Next, they read and discuss the Preamble to the Declaration of the Rights of Mother Earth before hearing witness Jojo Metha's perspectives on Ecocide.

Resources Used

Right to a clean, healthy & sustainable environment

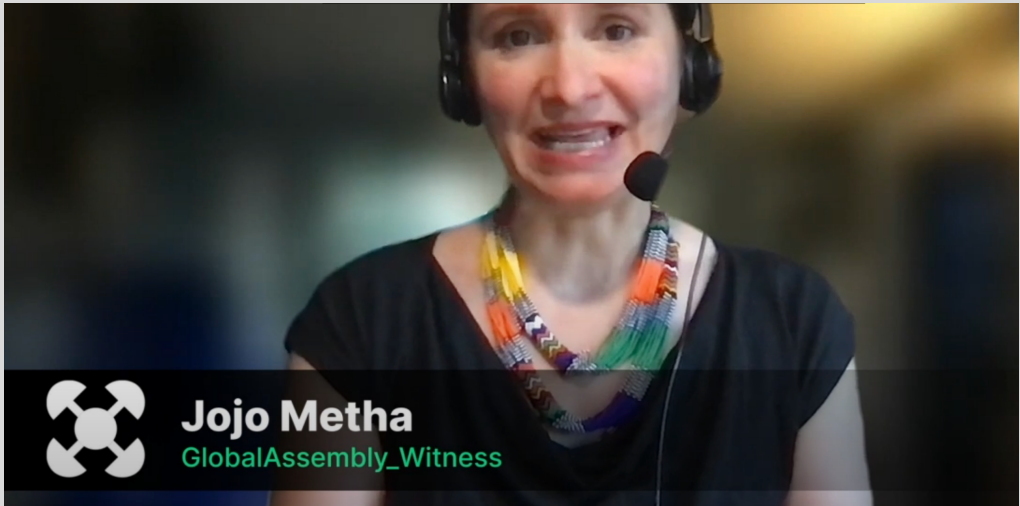

Declaration of the Rights of Mother Earth

Video: Witness, Jojo Metha, Executive Director Stop Ecocide

Time	Aim	Activity
12:00 20 min	1. Renaming 2. Check-in & Overview	Welcome & Rename Check-In Overview <ul style="list-style-type: none">• 2.4B: We heard from Vaine Wichman from the Cook Islands National Council of Women and continued our discussions on fairness in the context of her presentation. We read and started discussing the Universal Declaration of Human Rights, hearing from the Special Rapporteur on the Right to Development. We finished the session by discussing whether the Right to a clean, healthy and sustainable environment should be added to the Universal Declaration of Human Rights.• 3.1B: The aim of this session is to surface perspectives on the right to a clean, healthy and sustainable environment, and the rights of nature & the environment. We will also hear from another witness, Jojo Metha, who will present her perspective on Ecocide.

<p>12:20 25 min</p> <p>1. Discuss the recently adopted right to a healthy and sustainable environment</p> <p>2. Deliberate on the right, and Document Members' perspectives on it.</p>	<p>Right to a clean, healthy and sustainable environment (±5 minutes)</p> <p>A. Facilitator introduces the new resolution, using the passage below:</p> <p><i>"During the United Nations Conference on the Environment in 1972, UN Member States declared that people have a fundamental right to 'an environment of a quality that permits a life of dignity and well-being'. In 1994 a draft declaration on human rights and the environment was submitted to the UN that included 'the right to a secure, healthy and ecologically sound environment', but it was not passed at that time. On October 8th of this year, two weeks ago, the United Nations Human Rights Council passed a resolution recognizing access to a clean, healthy and sustainable environment as a human right. Out of 47 Member States that are members of the UN Human Rights Council, 43 voted to pass the resolution and 4 members abstained from voting. Abstaining from voting in this context meant that the Members chose to vote neither for or against the resolution."</i></p> <p>B. Facilitator reads the following excerpt from the new resolution:</p> <p><i>"The new political agreement:</i></p> <p><i>'Recognizes the right to a clean, healthy and sustainable environment as a human right that is important for the enjoyment of human rights.</i></p> <p><i>Notes that the right to a clean, healthy and sustainable environment is related to other rights, and existing international law.</i></p> <p><i>Affirms that the promotion of the human right to a clean, healthy and sustainable environment requires the full implementation of the multilateral environmental agreements under the principles of International Environmental Law."</i></p> <p>Notetaker records AMs' contributions & questions</p> <p>Discussion (±20 minutes)</p> <p><u>Begin with the following question, before transitioning to an open discussion:</u></p> <ul style="list-style-type: none"> Do you agree that the right to a clean, healthy and sustainable environment should be recognized as a human right?

	enforcement of right to a clean, healthy and sustainable environment	<ul style="list-style-type: none"> • The new human right to a clean and healthy environment is a political agreement. Do you believe the right to a clean, healthy and sustainable environment should be legally enforceable at the international level? • Do you believe that countries should have to report on their enforcement of this right?
13:20 10 min	Break	
13:30 50 min	1. Learn about the Universal Declaration of Rights of Mother Earth	<p>Preamble of Rights of Mother Earth (±10 minutes)</p> <p>A. Facilitator introduces the Preamble, using the passage below:</p> <p><i>"In April 2010, a global gathering of civil society and governments came together in Bolivia to draft the 'Universal Declaration of Rights of Mother Earth'. This declaration offers another perspective on rights: the rights of all nature, not just the rights of humanity. Unlike UDHR and the right to nature, this declaration on Mother Earth was written and declared by civil society and not the United Nations."</i></p> <p>B. AMs read the Preamble to the Rights of Mother Earth</p>
	<p>☞ See Reference of "Rights of Mother Earth" <i>Supplemental Workbook Section 3.1ii</i></p>	<p>Translated database of Rights of Mother Earth in text formats here.</p> <p>CHs are sent instructions in advance to locate a version in their AMs language & preferred format (text or audio), or prepare to orally translate the Preamble to their AMs.</p>
	2. Explore	Notetaker records AMs' contributions & questions
	perspective s on rights,	Discussion (±15 minutes)

	and document Members' perspective s on it.	<p><u>Begin with the following question, before transitioning to an open discussion:</u></p> <ul style="list-style-type: none"> • After reading the Declaration on the Rights of Mother Earth, would you agree with this statement: "Just as human beings have human rights, all other beings also have rights." ? • Would you agree with this statement: "Mother Earth and all beings of which she is composed have the right to life and to exist"?
14:20 35 min	1. Introduce and explore the concept of "ecocide"	<p>Watch: Witness Jojo Metha on Ecocide (±10 minutes)</p> <p>Jojo Metha co-founded Stop Ecocide in 2017 to support the establishment of ecocide as a crime at the International Criminal Court. She is also Chair of the charitable foundation, Stop Ecocide Foundation, and convenor of the Independent Expert Panel for the Legal Definition of Ecocide. In her presentation as a witness, Jojo Metha offers her perspective on 'ecocide'.</p>
	<p>🔗 Video: "Witness, Jojo Metha" here.</p> <p>Videos are cut with transcript slides, to allow for translation.</p>	
		<p>Facilitator reads out the following passage, to provide further context on the presentation:</p> <p><i>"Early drafts of the Rome Statute included the crime of environmental destruction, but it was removed after</i></p>

	<p><i>opposition on the basis that ‘the crime of environmental destruction’ wasn’t precisely defined. Instead, environmental destruction was relegated to a wartime offense that has never been enforced. Today, some national governments oppose the criminalization of the destruction of nature on the grounds that their countries need to exploit their nature for human development. As we heard from the witness, “ecocide” means unlawful or wanton acts committed with knowledge that there is a substantial likelihood of severe and either widespread or long-term damage to the environment being caused by those acts.”</i></p> <p>Notetaker records AMs’ contributions & questions</p> <p>Discussion (±25 minutes)</p> <p><u>Begin with the following question, before transitioning to an open discussion:</u></p> <ul style="list-style-type: none"> • After discussing the Declaration on the Rights of Mother Earth & listening to Jojo Metha’s presentation as a witness, do you believe we need a new law, such as criminalizing ecocide, that prevents serious harm to nature?

- Inputs into the COP Submissions

Consolidation of PreCOP V1

Editors consolidate the deliberation outputs of AMs from 2.3B - 3.1B into a first draft of the COP Submissions, to be reviewed & commented on by AMs in 3.2P.

Session 3.2P: October 23rd, 2021

Session Overview

The session begins with an explanation of COP26 from an overview of how AMs will observe sessions to how AM speaker will be selected via sortition to present the Assembly's submission(s). Next, AMs hear and discuss two perspectives on fossil fuels from witnesses, Paul Ekin and Christopher Asuquo Jackson. The remainder of the session is dedicated to reading and commenting on the first draft of the submission, consolidated by Editors from AMs' interventions between 2.3B-3.1B.

Session Outputs

- Deliberation & iterative review on framing question and Consolidated COP Submissions V1, “Section 2”
- Iterative review comments on remaining sections of Consolidated COP Submissions V1

Consolidation of PreCOPV2

Editors will integrate the iterative review comments surfaced on the remaining sections of the COP Submissions to generate a 2nd draft, to be partially voted & reviewed in 3.3B.

Session 3.3B: October 26th, 2021

Session Overview

The session begins with a brief discussion to review the framing question, which has thus far been guiding the deliberations, before AMs vote to approve the question for the purpose of their submissions to COP and future deliberations. Next, AMs review the second draft of the COP submissions, into which Editors have integrated comments from 3.2P. They begin by discussing and voting on Section 1, containing their overhead vision for the future. Discussion on the remainder of the consolidated draft follows. In order to elevate a diversity of perspectives, AMs listen to and discuss minority and/or dissenting views shared in various Breakout groups and consolidated in advance by Editors.

Vote: <i>Do you approve this framing question as the purpose of your submissions to COP and continued deliberation?</i></p> <p>AMs submit one of the following votes, and a 1-2 sentence explanation of their vote</p> <ul style="list-style-type: none"> • “Yes” to approve the framing question • “No” to reject the framing question • “Abstain/Undecided/I don’t know” <p>PreCOP V2: Vision (±30 min)</p> <p>A. Review & discuss “Section 1: Paris Agreement” The vision that was consolidated after iterative review on 3.2P was: “The world should make every effort to fulfill the Paris Agreement and to limit global warming to 1.5c”</p> <p>B. Vote: <i>Do you affirm this vision for the future?</i></p> <p>AMs submit one of the following votes, and a 1-2 sentence explanation of their vote</p> <ul style="list-style-type: none"> • “Yes” to approve V1 as the final version • “No” to reject V1 • “Abstain/Undecided/I don’t know”
13:10 10 min		Break
13:20 90 min	1. Continue iterative review & generation on COP	<p>Notetaker records AMs’ contributions & questions</p> <p>Continued: Iterative review on PreCOP V2 (±70 min)</p> <p>For each section of the Submission draft:</p> <p>A. Facilitator reads the section out loud</p> <p>B. AMs surface comments & questions</p>

Submission s V2	<p>C. Read & consider alternative perspectives on the section, consolidated from minority views surfaced during deliberations last week</p> <p><u>Prompt questions:</u></p>
	<ul style="list-style-type: none"> • Why might people feel this way? • Do these alternative perspectives make you reconsider your own perspective? If so, how?
<p>See Reference of “Consolidated Dissent”</p> <p>Consolidated Versions reflect “majority” opinions and contributions . To include and consider alternative perspectives, AMs also review consolidated perspectives shared by a smaller portion of AMs during</p>	<p><u>Section 2: Equity (±15 min)</u> Consolidated Dissent: The burden of combating climate change should not be left solely to rich countries. All countries must assume responsibility. We have learned about climate change only in recent decades. Blaming will not solve anything. There are also some developing countries which have high emissions, they have to assume responsibility also.</p> <p><u>Section 4: Human Rights and Climate Change, Right to Clean Environment (±15 min)</u> Consolidated Dissent: UDHR is not relevant because: 1 they need updating, they were written to respond to a specific problem at a specific time in history 2 they are too vague, open to misinterpretation 3 they are too idealistic and never applied properly, they stay on paper 4 they are not universal, different contexts would require different sets of rights</p> <p>Consolidated Dissent: Right to a clean environment should not be included in the UDHR because 1 we need stronger laws which can be directly implemented, simply adding one article to UDHR is not enough 2 Adding it will not make a difference since human rights cannot be protected in practice. We should focus on practical solutions rather than abstract principles. 3 There are already many treaties on environmental protection. We should focus on operationalizing these better. 4 It's too early to determine this as a human right since different countries have different contexts and priorities (e.g. right to development) 5 environment is simply an irrelevant concept to be associated with human rights.</p> <p><u>Section 5: Rights of Mother Earth, Ecocide as a Crime (±15 min)</u> Consolidated Dissent: 1. Mother Earth's right to life should be taken in context and is not all-encompassing, for instance (A) invasive species (B) human's right/need to use natural resources. 2. The term “Mother Earth” is emotionally manipulative. Let's use “nature” instead which does not personify, is gender-neutral, and is not emotionally loaded. 3. On Ecocide: We should focus on extant</p>

this iterative review.

environmental laws, there are enough of them already. Making new laws is no good unless we can enforce them properly.

Transition to Breakout Rooms

13:05
100 min

1. Read & vote Title & on each statement in Consolidated COP Submission s V3

Breakout Rooms

Titles

The following Titles were submitted on the Submission by AMs

- Peoples' Declaration on the Climate & Ecological Crisis
- Peoples' Declaration for the Sustainable Future of Planet Earth
- Peoples' Call for Citizen Involvement in Climate Emergency
- Peoples Statement to Prioritize Collective Interest

AMs submit a vote indicating their preference for one of the titles

For each section of the Submission:

- Facilitator reads all the statements in that section out loud
- Vote on **each statement**: *Do you validate this statement to be included in your Submissions to COP26?*

AMs submit one of the following votes, and a 1-2 sentence explanation of their vote

- "Yes" to approve V3 statement
- "No" to reject V3 statement
- "Abstain/Undecided/I don't know"

Return to Plenary Main Room

14:45
10 min

1. Present vote results

2. Introduce the 10 sortition-selected AM COP26 Speakers

Plenary Main Room

Present Vote Results

All statements in PreCOP V3 were validated by a majority vote. The selected Title is, "Peoples' Declaration for the Sustainable Future of Planet Earth"

Introduction of COP26 AM Speakers

Out of the AMs who opted in to speak at COP26, ten were selected by sortition. Each AM will introduce themselves.

04

Objectives

1. Share the People's Declaration on the Sustainable Future of Planet Earth at COP26
2. Observe COP26
3. Discussion of COP26
4. Continued revision and generation into the People's Declaration

Outputs

1. Crowdsourced list of topics for learning and discussion in Block 5
2. Comments and new inputs into the People's Declaration

COP26 Observation: November 1st - 20th

Collective Observation

The 26th COP, or the Conference of Parties takes place in Glasgow, UK November 2021. COP is the official United Nations Climate Change Conference. Tens of thousands of people, including world leaders, negotiators, experts, press, and civil society, will gather to evaluate governments' progress since the Paris Agreement and contribute to the dialogue around addressing the climate and ecological crisis.

For the Global Assembly to meaningfully observe and reflect on the COP proceedings, each AM will watch at least 8 hours of sessions and/or news coverage around the conference and share their observations back to the Assembly. The aim of the collective COP observation is for AMs to:

1. **Learn** from the ideas that are shared at COP and deepen their collective understanding of the crisis and strategies to address it
2. **Evaluate** the discussions they observe amongst world leaders to hold current actors accountable to the GA COP Submissions

Observation Pledge

Each AM will pledge, or commit, to observe and share reflections on sessions, totalling up to at least 8 hours of observation.

COP26 Journal

After observing sessions, AMs will journal and submit a short reflection through a form that will be consolidated by the Editor Team and anonymously shared back to other Assembly Members for collective learning.

Session 4.1B: November 16th, 2021

Session Overview

Following an extended check-in, AMs begin discussing their observations of COP26. In light of these reflections, AMs revisit the People's Declaration, identifying if there are any changes they would like to make to the document. Finally, the session concludes with a generative discussion on what topics they would like to learn more about in the following sessions, and whom they would like the Global Assembly team to invite as a speaker or witness.

Session 4.2P: November 20th, 2021

Session Overview

In this session, AMs continue to share their reflections on COP26. Presentations from five speakers as well as a reading of an abridged version of the COP26 Presidency Summary supplement this discussion. The latter half of the session is dedicated to a discussion on effective climate action and additional generation of topics for learning and deliberation in Block 5.

Objectives

1. Generation and iterative review of the People's Declaration

Outputs

1. Final version of the People's Declaration on the Sustainable Future of Planet Earth

Session 5.1P: December 4th, 2021

Session Overview

The session begins with an overview from the Global Assembly team on the project; points covered include details on who is organizing the Global Assembly, its values, long-term vision and preliminary plans for advocacy within global environmental governance after the close of the Core Assembly. Next, the team presents the agenda for Block 5, crowdsourced from AMs' preferences recorded in Block 4. In Breakout rooms, Assembly Members meet in "mixed" groups for the first time in plenary, joined by a different Facilitator and AMs than their usual, weekly Breakout groups. Here, AMs reflect further on the outcomes of COP26 and specifically, their implications on their own lives and communities. This discussion is supplemented by a presentation from the Global Assembly team on the group's collective perception of COP26 sessions, consolidated from data submitted in COP Journals. The session closes with a discussion on the purpose and audience of the People's Declaration, to frame the work ahead of revising and adding to the document.

Check-in & Overview	Plenary Main Room Welcome Global Assembly Overview Global Support Team presents a recap of the project, focusing on: <ul style="list-style-type: none">• Who is organizing the GA• Values of the GA• Long term vision• Plan post-deliberation<ul style="list-style-type: none">○ What's ahead for global environmental governance

- How the 2021 GA's deliberations will inform the agenda for future GAs

Continued below.

🔗 Video: "GA Overview" [here](#).

Recording from 5.1P covering the Global Support Teams presentation on the GA & next steps.

Plenary Main Room Overview

- What's ahead in Block 5
 - In Block 4, AMs shared which topics they would like to focus on. The Global Support Team organized the responses to determine the top 3 most popular topics. These were **(1) Governance, Monitoring & Enforcement, (2) Energy (Technology & Transition) and (3) Energy, Media & Civic Engagement**. We will explore these topics through speakers & deliberations in our remaining sessions.
 - Additionally, we will start exploring the future agenda of the Global Assembly, discussing:
 - (1) Advocacy around Peoples' Declaration, for instance at the global conferences mentioned earlier, and how involved you'd like to be in this, in

- addition to other possibilities of staying involved in an AM alumni role
- (2) Whether the PD should be a starting place for the next Global Assembly, planned for 2023
- (3) Informing the agenda for Community Assemblies in 2022.

Workflow Crowdsourc ed Agenda- Setting for Block 5

- 5.1P: Today, you will reflect further on the outcomes of COP and what that means for you and your own context/daily lives. You will also begin to identify the purpose and audience of the Peoples' Declaration.

12:35
15 min

1. Present data on AMs' collective perceptions of COP26

Plenary Main Room

Summary of COP, by Zone

The Global Support Team shares consolidated findings from AMs' COP Journals, detailing the group's collective perception of COP26 Blue and Green Zones. Overall, observation of the Green Zone events provided AMs a much greater feeling of alignment with the Declaration and inspired a

much greater faith in humanity to address the climate and ecological crisis.

Before transitioning to Breakout Rooms, AMs are asked to consider: Has your perspective on COP changed since observing sessions to hearing from speakers in the last plenary?

Transition to Breakout Rooms

50 min

1. Reflect further on the outcomes of COP and what that means AMs' own contexts

Breakout Rooms

AMs meet in "mixed" breakout rooms for the first time in plenary, joined by a different Facilitator and AMs than their usual, weekly breakout groups.

Introductions & Icebreaker (±20 min)

Notetaker records AMs' contributions & questions

Discussion: Wrap-Up Reflections on COP26 (±30 min)

AMs share their final reflections on COP26, focusing on how the conference may have related to their own lives or communities.

Prompt questions:

- Connections to your life
 - To what extent was COP26 covered in your local news/media? What did you hear/notice?
 - How would you have liked COP26 sessions or news about COP26 to have been shared with you/your fellow citizens?
 - How aware were your friends or neighbors that COP26 was happening, and how the conclusions might affect their/your daily lives?
 - If relevant, can you describe a conversation you had with neighbors and friends about COP26?
- Were you aware of your own country's goals at COP26?
 - If yes, did you feel that they were aligned with the Peoples' Declaration? And what else might be needed?

	<ul style="list-style-type: none"> • Reflections on document shared in plenary <ul style="list-style-type: none"> ◦ After hearing the COP26 summary by Zone, speakers from last week & discussions with fellow AMs, do you have any final takeaways on COP to share?

Session Outputs

- Breakouts' responses on the purpose & audience of the Peoples' Declaration on the Sustainable Future of Planet Earth, to be consolidated by the Editor Team into a Preamble.

Session 5.2B: December 7th, 2021

Session Overview

The session starts with a video from the closing session at COP26. Then, members should have a short (±15 minutes) opportunity to share initial reflections, to support their comprehension.

This is followed by three videos from Assembly Members sharing their lived experiences and perspectives related to the energy transition to respond to interest from Members to hear from each other. And, again, this will be followed by a short (±10 minutes) opportunity to share initial reflections, to support Members' comprehension.

The discussion section of the session today provides an opportunity for members to consider the statement they had co-created on fossil fuels, and to generate additional and open-ended inputs to their Declaration on the topic of energy transition. Finally, Members will be invited to select a topic to work on during the next plenary, and to submit a video message for their colleagues.

Time	Aim	Activity
12:00 20 min	1. Renaming 2. Check-in & Overview	Welcome & Rename Check-In Overview <ul style="list-style-type: none"> 5.1P: You learned more about the GA and what's ahead. You continued reflecting on the outcomes of COP26, specifically in the context of your own daily lives and communities. Finally, you began to identify the purpose and audience of the Peoples' Declaration. 5.2B: We will start exploring the Energy Transition topic, one of the most top most-requested themes for further discussion. We will watch an excerpt of the final meeting of COP26 national delegations, focusing on negotiations around the wording of the Glasgow Climate Pact on coal, and hear recorded presentations from select AMs on their perspectives on energy and energy transition.
12:20 30 min	1. Watch COP26 Closing Plenary excerpt on coal negotiations 2. Surface initial reactions and thoughts to the COP26 proceedings on the	COP26 Closing Plenary Excerpt <p>A. Facilitator introduces the video excerpt, with the following passage:</p> <p><i>"We are going to watch excerpts from a meeting between national delegations near the end of COP26, to make final decisions on the Glasgow Pact, the key agreement between nations at COP26. The clause being discussed in this video is about the transition away from fossil fuels, and would become the first time that an explicit commitment to phasing out any fossil fuel had been included in an international climate pact signed by India. The video excerpt will cover a statement from India, representing a group of developing countries including China, South Africa, and Bolivia, to change the language in the agreement on coal reduction, from 'phase out' to 'phase down'. Then, the video shows four other national delegations share their discontent with the revision. There are two important factors worth considering when watching this session. First, the Glasgow Pact only refers here to coal, not to oil or gas. Countries such as India, China, South Africa are producers of coal and they are also heavily reliant on coal for their national energy demands. Developed countries, such as the UK, have largely transitioned away from coal towards natural gas, which they produce. Second, The Glasgow Pact did not mention any new climate financing to support developing countries, such as India, to</i></p>

<p>revision regarding coal</p>	<p><i>transition towards renewable energy while ensuring their citizens have access to energy.”</i></p> <p>B. Watch video except (±10 min)</p> <p>Notetaker records AMs’ contributions & questions</p> <p>C. Discussion: Initial reflections on video excerpt (±20 min)</p> <p><u>Prompt questions:</u></p> <ul style="list-style-type: none"> • What words, expressions, gestures, tone of voice etc....struck you particularly or stood out to you? • How did the presentations make you feel and why? eg. Happy, hopeful, angry, anxious, despondent, etc. • Were you surprised by the process world leaders took to discuss and ratify the Glasgow Pact, based on what you saw visually in the videos, or on comments made by national delegations on their experience with the process? • Do you have any questions on the content of the video? <p>🔗 Video: “COP26 Closing Plenary Excerpts” here.</p> <p>Selected excerpts from the Closing Plenary including statements from the Indian delegation on proposed amendment & opposing statements.</p>
<p>12:50 45 min</p> <p>1. Hear & discuss AM perspectives on fossil fuels, energy & just transition</p>	<p>AM Recorded Perspectives</p> <p>In addition to expert speakers and witnesses, AMs also learn from the lived experiences & perspectives of each other. Recorded presentations from AM witnesses in the post-COP deliberations intentionally elevates this peer-to-peer learning. In this session, AMs were volunteered by their Facilitators and/or the Global Support Team to speak to their perspectives & personal experiences in relation to fossil fuels & energy transition.</p> <p>A. Watch recorded presentations (±25 min)</p>

- Do you have any questions on the content of the video?

13:35
10 min **Break**

13:45
65 min **1.** Deliberate and “weigh” trade-offs around energy transition

2. Share AM preferences on retaining clause on fossil fuels in Declaration OR expanding

Notetaker records AMs’ contributions & questions

“So What?” Discussion: Energy, Fossil fuels & Just Transition (±30 min)

After 2 rounds of viewing & initial reflections, on COP26 negotiations & AM witnesses, AMs go further into the topic of Energy Transition. Open questions presented by AM witnesses & the COP26 negotiations are used as starting points to discuss trade-offs related to Energy, Fossil Fuels & Just Transitions.

Prompt questions:

- Your colleagues highlighted the need to center equity and fairness in the transition away from fossil fuels, for instance providing alternatives & securing livelihoods for workers who rely on fossil fuel industries. How do you balance the need to cut fossil fuel emissions with the fact that 1 in 10 people don’t have access to electricity, and the majority of global energy supply is fossil fuels?
- Your colleagues spoke about the need to address fossil fuel companies & corporations, more so than individuals’ energy use. Who do you believe should be responsible for changing behavior?

<p>into a standalone section</p> <p>3. Generate inputs on energy, just transitions & fossil fuels for Peoples' Declaration</p>	<ul style="list-style-type: none"> Part of the context we considered to the proposal of the amendment on coal, was that the Glasgow Pact did not mention any new climate financing to support developing countries, such as India, to transition towards renewable energy while ensuring their citizens have access to energy. Are there any inputs you would like to add to the current clause in the Peoples' Declaration around the responsibility of developed countries, with greater historical emissions, to finance the energy transition in developing countries? <p>"Now What?" Discussion: Energy, Fossil fuels & Just Transition (±35 min) In light of their discussions on Energy Transitions, AMs consider amendments and new inputs into the Peoples' Declaration.</p> <p>A. Record preference on the need to amend existing clauses in the Peoples' Declaration Fossil Fuels & the Energy Transition was the 3rd most popular topic for further exploration. In the draft of the Peoples' Declaration submitted to COP26, there is only one clause (Section 1 Clause 2, which explicitly mentions fossil fuels.</p> <p><i>(1ii) We believe that the Paris Agreement is humanity's best chance to avoid dangerous climate change. Parties to the Agreement have to adopt immediate measures for transitioning to a sustainable low-carbon economy. These measures include shifting financial support from fossil fuels to clean energy, improving energy efficiency, introducing carbon taxes, and tackling issues of overpopulation and overconsumption.</i></p> <p>Notetaker records AMs' preferences & reasons AMs have an opportunity to indicate their preference for expanding this mention of fossil fuels & energy transition into a new section of the Peoples' Declaration. Each AM indicates:</p> <ul style="list-style-type: none"> Yes, I'd like to expand the section & why No, I'd like to keep the section as is & why <p>Notetaker records AMs' contributions & questions B. Open generation of inputs into the Peoples' Declaration</p>
<p>14:50 10 min</p> <p>1. Record which theme</p>	<p>Record preferences for Breakout "theme" in Plenary To ensure that AMs are able to contribute on topics they are most interested in, Breakout rooms in</p>

each AM prefers to discuss in 5.3P

2. Record volunteers for recorded AM witness statements

5.3P will be divided into 3 “themes”:

1. “Monitoring & Enforcement”
2. “Education & Awareness”
3. “Energy Transition”

Notetaker records AMs’ preference

Each AM indicates their preference for the theme they would like to discuss further on.

Record volunteers for recorded statements

AM witnesses for 5.2B were volunteered by Facilitators and/or members of the Global Support Team, based on an awareness of particular lived experiences & viewpoints relevant to the energy topic. Going forward, all AMs are invited to submit video recordings to share with other AMs on the three crowdsourced topics for further exploration, mentioned above.

Notetaker records AMs’ preference

AMs indicate if they would like to record a statement, for viewing in 5.3P or asynchronous viewing. The Global Support Team will be in touch with more details with those who indicate their interest here.

Session Outputs

- Inputs into the Peoples’ Declaration
- Recorded preferences on expanding clauses on Fossil Fuels & Energy Transition in the Peoples’ Declaration
- Recorded AMs’ preferences on theme for breakout in 5.3P
 - Monitoring & Enforcement
 - Education & Awareness
 - Energy Transition
- Volunteers to record witness statements on the three themes above

Consolidation of Peoples’ Declaration PostCOP V1

The Editor Team consolidates new inputs, on the Energy Transition, into the Peoples’ Declaration submitted at COP26, or the PreCOP V3, to produce a PostCOP V1.

Session 5.3P: December 1th, 2021

Session Overview

The plenary session starts with an introduction activity together, introducing the Climer Cards and asking Members to share a card that describes how they are feeling so far in the GA journey.

In Breakout Rooms, each “committee” starts with an icebreaker so Members can introduce themselves. Then, each Breakout will watch recorded videos of the expert speakers or Assembly Members presenting on their topic. This is followed by a short opportunity to share initial reflections, to support their comprehension.

The discussion section of the breakouts today provides an opportunity for members to consider existing clauses of the Peoples’ Declaration on their respective topics. For M&E and A&E, Members will indicate their preference for changing or retaining the **structure** of the topics in the current Declaration. For Energy Transition, Members will review the existing clauses AND newly consolidated inputs on Energy from 5.2B, and comment on new inputs + ideas for combining it into existing clauses. Finally, Members will have an opportunity to generate additional and open-ended inputs to their Declaration on the respective topics.

Awareness &
Education
for PD

Awareness & Education in the Peoples’ Declaration PreCOP V3 (±40 min)

A. Review existing mentions of awareness & education in the Peoples’ Declaration PreCOP V3, or the version submitted to COP26

(3iv) Awareness should be raised on climate change and citizen participation through education and media.

(4v) To raise awareness on human rights and the human values which bolster these rights, governments must promote education and community engagement.

(5iv) To raise awareness on Ecocide and the rights of Nature, governments must promote education and community engagement.

Notetaker records AMs’ preferences

B. Record AMs’ preference on amendments to the PD

Each AM shares if they believe clauses on Awareness & Education should be expanded into a larger stand-alone section in their PD.

- Yes, and why?
- No, and why?

	<ul style="list-style-type: none"> • Not sure <p>Notetaker records AMs' contributions & questions</p> <p>C. Open generation of inputs into the Peoples' Declaration on Awareness & Education AMs discuss & surface anything new they would like to add or change on Awareness & Education in the PD.</p> <p><u>Prompt questions, if needed:</u></p> <ul style="list-style-type: none"> • The AMs you heard from gave examples of actions to boost education & awareness, such as creating classes in school curricula on climate change, or printing awareness slogans on products (similar to health warnings on cigarettes). • Was there anything mentioned that you particularly resonated with? Can you describe what kinds of actions you want to see around Awareness & Education on this issue? • Speakers talked about both the power of informed individuals to pressure companies and countries, as well as the need to keep in mind the bigger picture, or systemic problems. Who do you believe holds the power in addressing the climate & ecological crisis, individuals or governments & corporations? <ul style="list-style-type: none"> ○ Then, who do you believe is responsible to address the climate & ecological crisis, individuals or governments & corporations? ○ Does this change your perspectives on the need for public education and awareness?
<p>1. Watch & Discuss Speaker, Julia Steinberger</p>	<p>Breakout Rooms</p> <p>Topic: Energy Transition</p> <p>6 Breakouts</p> <p>Introductions & Icebreaker (±15 min) Each Member introduces themselves & describes how they are feeling so far in the Global Assembly journey.</p> <p>Watch: Speaker, Julia Steinberger (±20 min) Julia Steinberger is a Professor of Ecological Economics at the University of Lausanne, in Switzerland. She is one of the members of the Global Assembly's Knowledge and Wisdom Committee and a Lead Author for the IPCC. Her research examines the connections between</p>

	<p>resource use (energy and materials, greenhouse gas emissions) and societal performance (economic activity and human wellbeing). She has received an Award for her research project 'Living Well Within Limits' investigating how universal human well-being might be achieved within planetary boundaries.</p>
<p>2. Review & comment on new Energy Transition outputs from 5.2B.</p> <p>3. Generate new inputs on Energy Transition for PD</p>	<div data-bbox="312 597 1929 760" data-label="Text"> <p>🕒 Video: "Julia Steinberger" here.</p> </div> <p>Notetaker records AMs' contributions & questions</p> <p>Discussion: Energy Transition(±20 min)</p> <p>A. Surface initial reflections to Julia Steinberger's presentation</p> <p>In her presentation, Steinberger highlighted that to explore the energy transition, we need to understand that there is a <u>demand side</u> and a <u>supply side</u>.</p> <ul style="list-style-type: none"> • What stood out for you about the <u>supply side</u>? • What about the <u>demand side</u>? • Anything that surprised/challenged/worried you? <p>B. Explore efficient & sufficient energy services</p> <p>In her presentation, Steinberger talked about the need to move to more <u>efficient</u> and <u>sufficient</u> energy services. AMs discuss what efficient & sufficient energy services look like in their own contexts and differing energy needs.</p> <p><u>Prompt questions:</u></p> <ul style="list-style-type: none"> • What does "sufficient" mean for you personally? What energy needs do you have in your life? <ul style="list-style-type: none"> ◦ Transport (to go to work, on holidays? What kind of transport do you use?)

- Cooking (what energy supply do you use to cook? How much do you use?)
- Heating / cooling your home (do you feel you manage to keep cool in the summer or warm in the winter in your home? Do you need a lot of energy to do that?)
- Leisure?
- Anything else?
- If you were asked to cut down your energy use, do you feel it would be fair?

10 min **Break** in Breakout Room

Energy Transition in the Peoples' Declaration (±35 min)

- A. Read clauses on Peoples' Declaration PreCOP V3 on Energy Transition (1i & 1ii) & new consolidated clauses on Energy Transition, included in PostCOP V1.

(1i) Countries, governments, and people worldwide must make every effort to reduce global emissions drastically and limit global warming to 1.5°C in accordance with the Paris Agreement.

*(1ii) We believe that the Paris Agreement is humanity's best chance to avoid dangerous climate change. **Parties to the Agreement have to adopt immediate measures for transitioning to a sustainable low-carbon economy. These measures include shifting financial support from fossil fuels to clean energy, improving energy efficiency, introducing carbon taxes, and tackling issues of overpopulation and overconsumption.***

Notetaker records AMs' contributions & questions

- B. Iterative Review: Statements on Energy Transition in Peoples' Declaration (±45 min)
AMs comment edits, additions or deletions they would like to be included in the next iteration of the Submissions, considering:

- Are there any statements you think should be combined?
- Is there anything **new** you would like to add on Energy transition in the PD?

Return to Plenary Main Room		
14:25	1. Open sharing in Plenary	<p>Open sharing</p> <p>Representatives from each Breakout share top 2 reflections discussed in Breakout Rooms.</p> <p>Aim to hear from at least 2 AMs in each topic.</p>
14:55	End	

Session Outputs

- Recorded preferences on expanding clauses on Awareness & Education and Monitoring & Enforcement
- Iterative review comments on existing clauses on three topics in **V1**, and iterative review comments on new clauses on Energy Transition in **PostCOP V1**.

Consolidation of Peoples' Declaration PostCOP V2

On Energy Transition, the Editor Team integrates iterative review comments surfaced on new clauses in **PostCOP V1**.

On Awareness & Education and Monitoring & Enforcement, iterative review comments on clauses in **PreCOP V3** are integrated, and new inputs are consolidated into stand-alone sections

Session 5.4B: December 14th, 2021

Session Overview

In the beginning of the session, the Facilitator should explain that the Editor team has consolidated the inputs AMs generated on Saturday, on the 3 topics of Awareness & Education, Energy Transition and Monitoring & Evaluation. Today's session will be an opportunity for AMs to review the consolidation of their and their peers' ideas into the Declaration. Next, AMs will review and comment on the Preamble, or introductory paragraph to the Declaration. Then, AMs will review and comment on the new sections of the Declaration following the guidelines included in the process plan.

We will review this new section together as well.</p> <p>Notetaker records AMs' contributions & questions</p> <p>Iterative review of Awareness & Education section (±35 min)</p> <p>AMs go through the same iterative review process as above, for each clause in the Awareness & Education section.</p>
<p>15:00 End</p>	<p>What's ahead?</p> <ul style="list-style-type: none"> • Forecast voting on Preamble & Energy Transition section, which has undergone 3 rounds of iteration for some AMs and 2 for others, in 5.5B. • There will be another round of iteration on clauses on Awareness & Education and Monitoring & Enforcement, to be integrated for final voting in 5.6P.

Session Outputs

- Iterative review comments on Peoples' Declaration PostCOP V2

Consolidation of Peoples' Declaration PostCOP V3

The Editor Team integrates iterative review comments to produce a **V3**.

Session 5.5B: December 16th, 2021

Session Overview

The session starts with a brief welcome and check-in activity. Next, the Facilitator should provide the overview of the session ahead and explain that the voting process on the Peoples' Declaration will be split between today and Saturday (the last session of the GA) in order to give AMs another opportunity to comment on the more recent additions to the Peoples' Declaration in the second half of this session. Finally, Members will watch a short recorded presentation from the Global Support Team describing how the Editors consolidate their inputs, and highlighting some values that guide them in this work.

Then, Members will vote on 5 updated clauses that were already part of the Declaration submitted to COP26 and 6 clauses in the new Energy Transition section. Next, Members will review and comment on 9 updated new clauses on Monitoring & Enforcement and Awareness & Education. Given that there are only 30 minutes available to do this, Members will have 10 minutes to read all 9 clauses, and the 20 minutes allotted for commenting should be structured around clauses they are most interested to comment on, rather than going through each clause. After this, Members will read and comment on the updated Preamble. The remaining time will be dedicated to surfacing any additional comments the Members would like to surface on the overall language of the Declaration.

edit in the Declaration	<ul style="list-style-type: none"> • Do you agree that the language of the Declaration should be simplified over all? • Do you agree that the clauses in the Declaration referencing “Developing vs. Developed” countries should include more detail on what this distinction refers to? <ul style="list-style-type: none"> ◦ If yes, can you describe one way we can define the difference between “Developing vs. Developed” countries?
15:00	<ul style="list-style-type: none"> • Post-deliberation survey: https://globalassembly.org/post-deliberation-questionnaire

Session Outputs

- Votes on Energy Transition Section in PostCOP V3 & 5 edits to clauses in the Peoples Declaration PreCOP V3
- Iterative review comments on PostCOP V3
- Overarching comments on language of the PD
- Post-deliberation survey

Consolidation of Peoples’ Declaration PostCOP V4

The Editor Team integrates iterative review comments on the Preamble, Awareness & Education and Monitoring & Enforcement sections into a **PostCOP V4**.

Session 5.6P: December 18th, 2021

Session Overview

The session begins in plenary with an activity for AMs to reflect on how their perspectives have changed throughout their participation in the Global Assembly. In Breakout rooms, AMs vote on all sections of the People's Declaration, and indicate preferences around their role as alumni Assembly Members, and the future of the Global Assembly. Groups that finish voting early take part in an optional activity sharing reflections on their journey so far & openly generating individual actions to take forward their learnings from this year. For the last 15 minutes of Breakout rooms, groups should create space to share parting messages with one another, sharing reflections on the journey so far and discuss how they'd like to stay in touch, if relevant.

Back in plenary, vote results are shared. Next, we will take "group photos" by asking each of the following groups to "raise their Zoom hand": Notetakers, Facilitators, Community Hosts/Translators and Assembly Members. Following the official close of plenary, representatives from each Breakout group will share creative presentations in the Closing Party.

Resources Used

Peoples' Declaration Consolidated PostCOP V4

Time	Aim	Activity
12:00 30 min	1. Rename 2. Welcome & Check-in	Plenary Main Room Welcome Intentions Return to their initial intentions: We have created a document containing stories & comments you shared during the very first session of the Global Assembly. It includes your hopes and dreams for the lives of your grandchildren, or future generations. And a letter you wrote with the other

		<p>Members of your home break outs to the rest of the Assembly Members.</p> <p>Want to invite you to open up that document, and go to your Breakout's page. We will spend ~10 minutes</p> <ul style="list-style-type: none"> • (1) Read & Reflect individually on your journey from that 1st session to today, considering how your perspectives may have changed. We encourage you to write down your thoughts on a piece of paper if you have! • Sharing back on intentions (3-5 Assembly Members, ask if anyone hasn't spoken yet.)
Transition to Breakout Rooms		
12:30 65 min	1. Vote on Peoples' Declaration 2. Vote on AM Alumni Role	<p>Breakout Rooms</p> <p>Voting on the Declaration (±65 min)</p> <ul style="list-style-type: none"> • Monitoring & Enforcement Clauses (2 clauses - 1v, 2v) • Awareness & Education Section (7 clauses - 6i~6vii) • Preamble (1 paragraph) <p>Notetaker records AMs' votes</p> <p><i>Do you validate this clause to be included in the final Peoples' Declaration?</i></p> <p>For each clause, AMs submit one of the following votes, and a 1-2 sentence explanation of their vote</p> <ul style="list-style-type: none"> • "Yes" to approve clause • "No" to reject clause • "Abstain/Undecided/I don't know"
13:35 10 min	Break	
13:45 50 min		<p>Voting (cont.) (±20 min)</p> <ul style="list-style-type: none"> • 7 summary statements <p>Following comments from AMs on the need to create a simplified version of the Declaration to increase accessibility, the Editor Team consolidated summary statements on each section.</p> <ul style="list-style-type: none"> • Overall Declaration (clauses that remain unchanged from PreCOP V3, or the version voted in

for submission to COP26 and 3 language edits)

AMs vote to confirm all of the clauses you voted in 3.4P prior to COP, and 3 language edits. The language edits were integrated by the Editor Team following AMs' comments on the need to qualify technical terms and specify the language around "developing/developed" countries to reflect their discussions on differences in living standards, energy access, or historical responsibility (such as emissions) between countries.

Notetaker records AMs' votes

Do you validate this summary statement/edit/clause to be included in the final Peoples' Declaration?

For each item, AMs submit one of the following votes, and a 1-2 sentence explanation of their vote

- "Yes" to approve clause
- "No" to reject clause
- "Abstain/Undecided/I don't know"

Alumni Role & Future Directions (±15 min)

- Would you like to join a voluntary meeting of the Global Assembly between March - May of 2022 to reconvene and discuss how you'd like to stay involved as an Assembly Member alumni community?
- As we did for COP26, we will be creating a community of AMs who are interested in advocating and speaking publicly on behalf of their personal experiences in the Assembly. Would you like to join this community of advocates, to be considered through an impartial lottery selection process to speak on behalf of your experiences & the Declaration at international events next year?
- Would you like to be contacted via your Community Host with updates about the Global Assembly? If you would like us to contact you via your personal email in addition to your Community Host, please also Private Message me your email with your preference.
- During your discussions after COP, you started discussing your vision for the Peoples' Declaration, starting with its intended purpose, and generating additional topics you hoped could be further deliberated on and added into the Declaration. Would you like to invite other individuals, organizations and governments to endorse and contribute to the Peoples' Declaration?
- AMs have indicated in order to address the climate & ecological crisis, we need to improve global governance and bring ordinary people into decision-making processes. This is

		<p>emphasized in the Peoples' Declaration. Would you recommend that the Global Assembly becomes a permanent part of global decision-making?</p> <ul style="list-style-type: none"> • Bringing together these 2 previous questions, would you recommend a global citizens' assembly in 2023 to continue your work of addressing the climate & ecological crisis? <p>Notetaker records AMs' votes</p> <p>On each of the questions above, AMs submit one of the following votes, and a 1-2 sentence explanation of their vote:</p> <ul style="list-style-type: none"> • "Yes" to approve clause • "No" to reject clause • "Abstain/Undecided/I don't know" <p>Check out (±15 min)</p> <p>AMs share a closing message to one another, reflecting on the journey they've been together this year and perhaps how they'd like to stay in touch after the close of the Assembly.</p>
14:40 20 min	Close	<p>Present vote results (±5 min)</p> <div> <p><i>Workflow</i></p> <p>Vote Results</p> </div> <p>Group photos (±5 min)</p> <p>Thank you's from Global Support Team (±5 min)</p> <p>Rain-making celebration, for closing (±5 min)</p>
15:00 60 min		<p>Optional Closing Party</p> <p>Each Breakout Room nominates one person to present a closing message.</p>

Session Outputs

- Votes, to produce the final **Peoples' Declaration on the Sustainable Future of Planet Earth**
